## Glossary

AB	Accelerated Benefits Demonstration
ADM	Awardee Data Mart
AIME	Average Indexed Monthly Earnings
BEST	Benefits Entitlement Services Team
BFW	Benefits forgone due to work
BIC	Beneficiary Identification Code
BMF	Budget Month Factor
BOAN	Beneficiary's Own Account Number
BOND	Benefit Offset National Demonstration
BOPD	Benefit Offset Pilot Demonstration
CAN	Claim Account Number
CDR	Continuing Disability Review
CER	Characteristics Extract Record 100% Field File
COLA	Cost-of-Living Adjustment
DAC	Disabled Adult Child
DAF	Disability Analysis File (previously known as TRF)
DBAD	Disabled Beneficiary and Dependents Extract
DCF	Disability Control File
DDS	Disability Determination Services
DER	Detailed Earnings Record
DI	Disability Insurance, also referred to as SSDI
DMG	Demographic component of the DAF
DWB	Disabled Widow Beneficiaries
EN	Employment Network (also called a TTW provider)
EPE	Extended Period of Eligibility
EVS	Enumeration Verification System
EXR	Expedited Reinstatement
FBR	Federal Benefit Rate
FCI	Federal Countable Income
FIPS	Federal Information Processing Standards (in reference to U.S. Census standardized codes for uniform identification of geographic entities)
FRA	Full Retirement Age

HI	Hospital Insurance (Medicare Part A)
HOPE	Homeless Outreach Projects and Evaluation Demonstration
HUN	Housed Under Number
ICD-9	International Classification of Diseases Coding Scheme
IPE	Individualized Plan for Employment, developed by State VR Agency
IRS	Internal Revenue Service
IRWE	Impairment-Related Work Expense
LAF	Ledger Account File
LAUS	Local Area Unemployment Statistics
MBR	Master Beneficiary Record
MEF	Master Earnings File
MHTS	Mental Health Treatment Study
MIE	Medical Improvement Expected
MO	Milestone + Outcomes payment system
MPR-EVS	Mathematica's EVS
NBS	National Beneficiary Survey
NSCF	National Survey of SSI Children and Families
NUMIDENT	Numerical Identification File
OIM	Office of Information Management
OO	Outcomes-Only payment system
PAN	Person's Account Number
PASS	Program to Achieve Self-Support
PHUS	Payment History Update System
PIA	Primary Insurance Amount
PIN	Personal Identification Number
POD	Promoting Opportunity Demonstration
POMS	SSA's Program Operations Manual System
PROMISE	Promoting Readiness of Minors in SSI
Provider	Service provider under TTW (also called an EN)
PUF	Public Use File
REMICS	Revised Management Information Counts System
RIB	Retirement Insurance Benefits
RMA	Retrospective Monthly Accounting
RSA	Rehabilitation Services Administration

RSA-911	RSA Case Service Report
SAIPE	Small Area Income and Poverty Estimates
SAS	Statistical Analysis Software, used to produce the DAF
SCWF	SSI Companion Work File
SED	Supported Employment Demonstration
SER	Summary Earnings Record
SGA	Substantial Gainful Activity
SMI	Supplemental Medical Insurance (Medicare Part B)
SNAP	Supplemental Nutrition Assistance Program
SSN	Social Security Number
SSA	Social Security Administration
SSDI	Social Security Disability Insurance (also referred to as DI)
SSI	Supplemental Security Income
SSI-LF	SSI - Longitudinal File
SSR	Supplemental Security Record
STW	Suspension or termination of cash benefits for work
T2	Title II, the SSDI Program
T16	Title XVI, the SSI Program
TANF	Temporary Assistance for Needy Families
TCNEI	Total countable non-earned income
TKT	DAF component containing data related to TTW participation
TRF	Ticket Research File, now called the DAF
TTW	Ticket to Work
TWP	Trial Work Period
VR	Federal/State Vocational Rehabilitation program/agency
VRMS	Vocational Rehabilitation Reimbursement Management System; data from this system is contained in the Payments component
YTD	Youth Transition Demonstration

## Overview of DAF Documentation

The documentation for the DAF consists of the eleven volumes described below. Questions about these documents should be directed to [ORDES.DAF@ssa.gov](mailto:ORDES.DAF@ssa.gov). All of these documents are available at <https://www.ssa.gov/disabilityresearch/daf.html>.

- **Volume 1: Getting Started with the DAF21.** Provides an overview of the structure and contents of the DAF and related linkable files.
- **Volume 2: Working with the DAF21.** Contains practical suggestions such as how to extract data and interpret blank or missing variables as well as more detailed information on DAF data marts and linkable files.
- **Volume 3: Tips for Conducting Analysis with the DAF21.** Contains suggestions for working with common research concepts in the DAF such as program participation, benefits paid versus benefits due, and constructed measures related to beneficiary work activity resulting in the loss of cash benefits.
- **Volume 4: Lists of DAF21 Variables.** Contains lists of new, changed, and deleted variables, as well as lists of variables by DAF component and analytic category.
- **Volume 5: DAF Variable Detail Pages.** Contains specifications for each DAF variable, including name, definition, data format, identification of the DAF component to which it belongs, data source, availability, and (where applicable) SAS code used to construct the variable.
- **Volume 6: Validating the DAF21 Against Other Sources.** Provides an explanation of validation methods and summary of validation results.
- **Volume 7: DAF21 Development History and Construction Methods.** Describes key changes in DAF construction methodology over time as well as a description of each step in the current year DAF construction process.
- **Volume 8: DAF21 Construction Workflow Charts and Task Tables.** Provides detailed information in both chart and table format on each step in the current year DAF construction process.
- **Volume 9: DAF21 Source File Descriptions.** Describes the administrative source files used to construct the DAF.
- **Volume 10: DAF21 Administrative Source File Documentation.** Contains documentation from SSA or other agencies on the administrative source files described in Volume 9.
- **Volume 11: DAF21 Construction Code.** Contains all SAS code used to construct the DAF.
- **Volume 12: DAF21 RSA Administrative Source File Documentation.** Contains a description of the processing of Rehabilitation Services Administration (RSA) data for linkage to the DAF, along with documentation from RSA on the RSA-911 files.

The following table provides specific locations for common research-related questions and issues.

In order to ...	Refer to ...
Get started with a research task	Volume 2, "Working with the DAF21," for information about selecting beneficiaries using finder files versus selection criteria
Identify what's changed in the latest version of the DAF	Volume 1, "Getting Started with the DAF21"
View lists of DAF variables	Volume 4, "Lists of DAF21 Variables"
Understand individual variable definitions, specifications, and value ranges	Volume 5, "DAF Variable Detail Pages"
Understand the structure of the DAF data files at a high level	Volume 1, "Getting Started with the DAF21"
Identify variables for a specific research task	Volume 4, "Lists of DAF21 Variables," for a list of variables contained within each DAF file and by analytic category
Understand the beneficiaries for which the DAF does and does not contain data	Volume 1, "Getting Started with the DAF21"
Identify administrative data sources for the DAF	Volume 9, "DAF21 Source File Descriptions"
Understand the linkage of the DAF to RSA-911 data and contents of the RSA files	Volume 12, "DAF21 RSA Administrative Source File Documentation"
Generate ideas for using the DAF more efficiently	Volume 1, "Getting Started with the DAF21" and Volume 2, "Working with the DAF21"
Find suggested ways to identify common research concepts in the DAF, such as calculating age of retirement, or disability title	Volume 3, "Tips for Conducting Analysis with the DAF21"
Understand what variables have changed in the most recent DAF	Volume 4, "Lists of DAF21 Variables"
Read about how information in the DAF is validated against other sources	Volume 6, "Validating the DAF21 Against Other Sources"

## I. Introduction

In this volume, we describe the RSA files that are associated with the DAF. In Section II, we provide an overview of the Department of Education's RSA-911 files; these files have changed during the years of the DAF, and thus is important for users to understand how the variables they're interested in may be different depending on the years of analysis. In Section III, we provide overview of the processing of the DAF-RSA linkable files, with more processing details available in Section IV. In Section V, we provide additional details on the elements in the RSA-911 file layouts, with those layouts provided by the Department of Education available in appendices.

This is the alternate version of Volume 12, which has been made compliant with section 508 requirements, but does not contain RSA policy directives as a result. Instead, we provide links to the RSA policy directives, when available, as posted by the Department of Education; we have not verified the compliance of those files to section 508 requirements.

## II. Overview of the RSA-911 Source Files

The DAF is linkable to RSA-911 files for VR service closures from fiscal year 1998 through the DAF calendar year. The appendices in this volume contain the reporting manuals and associated policy directives for the RSA-911 Case Service Report, including record layouts. However, the record layout changes four times in terms of data elements, from 2001 to 2002, from 2013 to 2014, at the start of the third fiscal quarter (July 1) of 2017, and at the start of the third fiscal quarter of 2020. Instruction and edit specifications change with each iteration, but the actual record layout only changes those four times.

In July 2017, the RSA underwent a significant change in data organization and format. Prior to that time, the data were annual fiscal year files that contained information collected by State Vocational Rehabilitation (VR) Agencies about all individuals whose cases were closed during the fiscal year, meaning they had applied for VR services at some point (and may or may not have received VR services before their case was closed). Beginning in July 2017, reflecting changes in VR service provision resulting from the Workforce Innovation and Opportunity Act (WIOA), the structure of the RSA-911 files changed in two ways: each annual calendar year now contains quarterly data containing records on both open (both cases that opened or remained open during a quarter) and closed cases, and the universe was expanded to include students who are receiving pre-employment transition services (pre-ETS) through the VR agency, even if not formally receiving VR services.

In DAF20, we incorporated a new policy directive (PD19-03) that builds upon the July 2017 format, but with modifications to variable contents and the deletion and addition of some variables. The intent of the changes was to reduce data collection burden on VR agencies, by eliminating 94 data elements that were part of PD16-04 and adding 14 elements. In particular, the changes:

- Removed unnecessary or duplicative post-exit data elements, education-related data elements, and employment outcome-related data elements;
- Removed the requirement to report comparable benefits for students with disabilities receiving pre-employment transition services;
- Streamlined the process for reporting public support and medical insurance coverage at application and exit;
- Removed unnecessary career, training, and other services data elements for reporting Title VI expenditures; and
- Added “Work Based Learning Experience” as a training service and other data elements related to the Individualized Plan for Employment and participation in education/training programs for calculating WIOA performance indicators.

When accessing the RSA-911 source files, special attention should be paid to both the position and length of the variables described by the pre-2002, 2002-2013, 2014 - June 2017, and July 2017 - present source file layouts. The change in July 2020 is also important to note, but many of

the elements remain unchanged from the period beginning in July 2017; the deleted elements still appear in the layout (with details at the beginning of the layout about elements that were dropped or modified) and the new variables have been added to the end of the layout. The variables dropped in July 2020 will show missing values for all records posted after this date. This is especially critical when the analysis covers multiple periods. It is also necessary to pay special attention to the possible variable values for each variable, as these can change from year to year. Each iteration of the RSA-911 documentation includes a summary of year-over-year changes.

This volume includes the source file layouts and associated materials for each iteration of RSA Policy Directive, which offers information to State VR Agencies about entering data on individuals they serve. The Policy Directives in place during the DAF years include (we show the layout associated with each policy directive in parentheses):

- Appendix A: Policy Directive RSA-PD-99-09 (pre-2002), effective September 8, 1999
- [Appendix B.1: Policy Directive RSA-PD-00-06 \(2002-2013\) layout, effective March 16, 2000<sup>1</sup>](#)
- Appendix B.2: Policy Directive RSA-PD-03-07 (2002-2013), effective September 25, 2003
- Appendix B.3: Policy Directive RSA-PD-04-04 (2002-2013), effective September 30, 2004
- Appendix B.4: Policy Directive RSA-PD-06-01 (2002-2013), effective October 24, 2005
- Appendix B.5: Policy Directive RSA-PD-07-01 (2002-2013), effective October 5, 2006
- [Appendix B.6: Policy Directive RSA-PD-12-05 \(2002-2013\), effective February 8, 2012](#)
- [Appendix C: Policy Directive RSA-PD-14-01, \(2014-6/30/2017\), effective October 25, 2013](#)
- [Appendix D: Policy Directive RSA-PD-16-04 \(7/1/2017 to 6/30/2020\), effective June 14, 2017, and covering data from July 1, 2017 onward](#)
- [Appendix E: Policy Directive RSA-PD-19-03 \(7/1/2020 onward\), effective May 6, 2019, and covering data from July 1, 2020 onward](#)

We do not post these RSA policy directives because the Department of Education produced the RSA policy directives and we have not verified that they are in section 508-compliant format. We have copies of all of the policy directives listed above and will provide them to users ‘as is’ upon request (requests may be sent to [ORDES.DAF@ssa.gov](mailto:ORDES.DAF@ssa.gov)).

---

<sup>1</sup> The 2002-post record layout is described in the March 2000 policy directive, which states, “All requested revisions should be completed in time for State agencies to report their Fiscal Year (FY) 2001 data in the new format.” However, the revised record layout does not take effect until the 2002 data.

### III. Overview of the DAF-RSA Files and Processing

We build a number of files using the RSA data in combination with the DAF; we refer to these files collectively as the DAF-RSA files. RSA data are accessible only to users with permission from the Department of Education.

Some DAF-RSA files contain records for all RSA participants while some contain records only for RSA participants who have a matching record in the DAF. Table III.1 lists the records included in each of the RSA files that we build to use with the DAF. The process used to verify RSA records is described Section III.A.

**Table III.1. DAF-RSA Files in DAF**

RSA file	Records included
1. RSA mini-DAF	DAF records for verified (described below) RSA participants who match DAF
2. RSA-911 verified SSN files	All verified RSA records
3. DAF-Linkable RSA summary file	All verified RSA records, but key variables only and annual records combined into a single record per PIN
4. DAF-Linkable LAUS and SAIPE files	DAF records for verified RSA participants who match DAF

Verified RSA files listed in Table III.1 are output from SSA to create and apply random identifiers, PINs; the process to apply PINs to the records is described in Section III.B. In previous versions of the DAF, we delivered two versions of the RSA data, one with SSNs, and another with PINs. Beginning in DAF18, only files with PINs are available to users.

#### A. Construction methodology - summary

There are 16 steps to construct the DAF-RSA files in DAF; more information about these steps and issues encountered when processing the files is contained in Appendix F. The following list provides a summary of those steps, while the table that follows contains a more detailed description of the methods used in each step.

- A. Convert RSA-911 file for the current year from source format to SAS format
- B. Use data from all years of RSA-911 files to create NUMIDENT finder
- C. Process NUMIDENT returns
- D. Verify the RSA records (see section III.B)
- E. Merge EVS results to RSA data
- F. Create DAF-Linkable file of RSA summary, with SSNs
- G. Create list of verified RSA SSNs
- H. Create DMG for RSA mini-DAF, with SSNs
- I. Create TKT base and annuals for RSA mini-DAF, with SSNs

- J. Create annuals for RSA mini-DAF, with SSNs
- K. Create DAF-Linkable LAUS-SAIPE files, with SSNs
- L. Create VRRMS and historical VRRMS files for RSA mini-DAF, with SSNs
- M. Create PAYMENT files for RSA mini-DAF, with SSNs
- N. Create RSA-911 verified SSN closure files, with SSNs
- O. Create PINs (see section III.C)
- P. Apply PINs to replace SSNs in files built in Steps 6, 8, 9, 10, 11, 12, 13, and 14. (files # 1, 2, 3, and 4)

## B. Process to verify RSA records

Before constructing the files in Table 1, the RSA data are first validated using the NUMIDENT to be sure that the person identified by the SSN in the RSA data is the same person identified by that SSN in the SSA data. Regardless of DAF participation, records are included in these files only if the RSA SSNs are verified by MPR-Enumeration Verification System (EVS) processing using the NUMIDENT file for verification. Through this process, called MPR-EVS, the data are verified on three attributes:

1. SSN - must match exactly
2. Year of birth - must match exactly
3. Gender-
  - If RSA Gender indicates Male or Female and NUMIDENT Gender indicates Male or Female but RSA Gender is different from NUMIDENT Gender, then the RSA Record is NOT VERIFIED (codes are valid but differ)
  - If RSA Gender indicates Male or Female and NUMIDENT Gender does not indicate Male or Female then record is VERIFIED (RSA has valid codes but NUMIDENT does not)
  - If RSA Gender does not indicate Male or Female and NUMIDENT Gender indicates Male or Female then record is VERIFIED (NUMIDENT has valid codes but RSA does not)

If RSA Gender does not indicate Male or Female and NUMIDENT Gender does not indicate Male or Female then record is VERIFIED (both RSA and NUMIDENT codes are invalid). We verify the SSNs for every RSA record, and use only the validated RSA records in the DAF-RSA files we create as described above. Because a participant may have several episodes of RSA participation, any SSN may occur multiple times in the RSA data. Therefore, when we verify RSA SSNs, we must verify every occurrence of an SSN. This is necessary because it is possible for the birth year or gender on one RSA record to be correct while the birth year or gender for the same SSN on a second RSA record is incorrect. Only one of these two records would be verified, and therefore appear in the DAF-RSA files, even though the SSNs are identical. We merge the verification results with the RSA-911 closure files, merging on gender and birth year as well as

SSN, to create a file that contains only the SSNs of verified RSA records. We then use the file of verified RSA SSNs to extract DAF records from every DAF component, as well as from every RSA-911 source file, thus creating DAF and RSA extracts for only verified RSA SSNs. These extracts are the basis for all the DAF-RSA files described in this volume.

### **C. Replacing SSNs with PINs**

After building the DAF-RSA files prior to delivery, verified SSNs are replaced with PINs. This is done in two steps in conjunction with SSA to create and apply PINs. The first program updates the SSN-PIN crosswalk by identifying any new SSNs that do not yet have a PIN, then creating a unique PIN value for each of those SSNs. After the crosswalk is updated, it is merged to each RSA-DAF deliverable so that each SSN record has the corresponding PIN, then the pinned version of the file is outputted with all SSN containing variables dropped.

### **D. Validation of the DAF-RSA files**

During construction of the de-identified DAF extract for verified RSA records, programmers conducted routine reviews to monitor data processing at each step. These included reviewing program output logs, checking that programs ran without interruption, and confirming that all output files were properly created, saved, and cataloged. At critical points during construction, record counts, frequencies, and summary statistics were produced and examined and compared against the previous DAF-RSA construction effort. Any significant discrepancy between the effort under development and the prior version could indicate a problem, such as a group of records being dropped or counted twice in error. Had such a discrepancy been found, Mathematica programmers would have examined the program code, output listings, and record dumps for an explanation, such as a code error, and if none were found they would then have contacted SSA staff for additional help in determining the reason for the change.

Additionally, when the new year of RSA data was converted from a text file to a SAS file, printouts of small numbers of records were examined and verified that the file layout was as expected.

Results from the submission of the NUMIDENT finder file were tracked and reviewed to ensure that all submitted finder records were matched to a corresponding returned record and that there were no duplicate returned records.

Before replacing the SSNs with PINs in DAF-RSA files, we check those extracts for any remaining PII information. We produce variable lists for each extract and review the lists to search for any variables long enough to contain SSNs, names, or other identifying information. If any are found, we drop them from the files.

Variables dropped for the de-identified DAF-RSA files include the following:

- CAN
- BGN

- BLN
- BMI
- FRSTNAME
- LASTNAME
- NAMESUFFIX
- HUN
- DUNS
- C\_1ST\_NAME
- C\_LAST\_NAME
- C\_XREF\_SSN
- CLNT\_FNM
- CLNT\_LNM
- CLNT\_MNM
- SSN

In DAF20, we benchmarked the RSA-911 files we received from the Department of Education for the July 2017 period onward to published statistics over the same time period. Specifically, we benchmarked the raw files we received against the WIOA Statewide and Local Performance Report for the period from July 2019 through June 2020.<sup>2</sup> Using the 2018,2019, and 2020 files provided by the Department of Education, we identified about 9 percent more participants and 2 percent more participants exited than the published statistics.<sup>3</sup> While our tolerance threshold is generally a bit narrower for DAF benchmarking exercises, we believe that the differences in this case are acceptable and may reflect slightly different selection criteria and different timing of data pulls, with the data for the DAF extracted at a later date (and therefore with more retroactive updates) than the published report. It is important to note that this exercise was conducted on the raw RSA-911 data, before applying EVS, and as such does not reflect the data as it will appear in the actual DAF-RSA files.

---

<sup>2</sup> Accessed on March 17, 2022 at <https://rsa.ed.gov/sites/default/files/publications/annual-reports/2019/ETA-9169%20AnnualReport-PY2019%20%20-%20National.pdf>.

<sup>3</sup> We selected observations where the application date and VR service start date were both on or before the end of the reporting period (June 30, 2020), the IPE date was not missing, and the VR exit date was missing or after the beginning of the reporting period (July 1 2019). This yielded 952,072 RSA participants in the data we received, compared with 872,862 in the published report, and 287,295 participants exited, compared with 280,592 in the published report.

## IV. Details About the DAF-RSA Files

Descriptions of each of the DAF-RSA files are provided in this section, with complete file names and mainframe locations.

### A. RSA mini-DAF

**Description:** The RSA mini-DAF with PINs (File #1) is a collection of files that contain all DAF variables with the exception of personally identifiable information (PII) variable such as SSN and name, for RSA participants.

**Data documentation:** Because the RSA mini-DAF contains all of the contents of the DAF, all of the DAF documentation may be relevant to users.

**These files use the following naming convention** (SAS member name in parentheses):

OPDR.TG.PRD.ETTW.RSAVER.DAF21.<name>.PIN (filename)

**The files in the RSA Mini-DAF with PINs** follow the same structure as the full DAF. The mainframe files are the demographic file (DMG), Ticket Base (TKTBASE), Ticket Annuals (TKTyyyy), and SSA Annuals (ANNyyyy). All file names are listed in the file of filenames:

OPDR.TG.PRD.ETTW.DAF21.FILES.NAMES.CURRENT

**All file names, with SAS member names in parentheses (each file includes only verified SSNs, with PINs applied):**

a. DAF DMG

OPDR.TG.PRD.ETTW.RSAVER.DAF21.DMG.PIN (DMG)

b. DAF Annuals

OPDR.TG.PRD.ETTW.RSAVER.DAF21.Y1994.PIN (Y1994)

OPDR.TG.PRD.ETTW.RSAVER.DAF21.Y1995.PIN (Y1995)

OPDR.TG.PRD.ETTW.RSAVER.DAF21.Y1996.PIN (Y1996)

OPDR.TG.PRD.ETTW.RSAVER.DAF21.Y1997.PIN (Y1997)

OPDR.TG.PRD.ETTW.RSAVER.DAF21.Y1998.PIN (Y1998)

OPDR.TG.PRD.ETTW.RSAVER.DAF21.Y1999.PIN (Y1999)

OPDR.TG.PRD.ETTW.RSAVER.DAF21.Y2000.PIN (Y2000)

OPDR.TG.PRD.ETTW.RSAVER.DAF21.Y2001.PIN (Y2001)

OPDR.TG.PRD.ETTW.RSAVER.DAF21.Y2002.PIN (Y2002)

OPDR.TG.PRD.ETTW.RSAVER.DAF21.Y2003.PIN (Y2003)

OPDR.TG.PRD.ETTW.RSAVER.DAF21.Y2004.PIN (Y2004)

OPDR.TG.PRD.ETTW.RSAVER.DAF21.Y2005.PIN (Y2005)

OPDR.TG.PRD.ETTW.RSAVER.DAF21.Y2006.PIN (Y2006)  
OPDR.TG.PRD.ETTW.RSAVER.DAF21.Y2007.PIN (Y2007)  
OPDR.TG.PRD.ETTW.RSAVER.DAF21.Y2008.PIN (Y2008)  
OPDR.TG.PRD.ETTW.RSAVER.DAF21.Y2009.PIN (Y2009)  
OPDR.TG.PRD.ETTW.RSAVER.DAF21.Y2010.PIN (Y2010)  
OPDR.TG.PRD.ETTW.RSAVER.DAF21.Y2011.PIN (Y2011)  
OPDR.TG.PRD.ETTW.RSAVER.DAF21.Y2012.PIN (Y2012)  
OPDR.TG.PRD.ETTW.RSAVER.DAF21.Y2013.PIN (Y2013)  
OPDR.TG.PRD.ETTW.RSAVER.DAF21.Y2014.PIN (Y2014)  
OPDR.TG.PRD.ETTW.RSAVER.DAF21.Y2015.PIN (Y2015)  
OPDR.TG.PRD.ETTW.RSAVER.DAF21.Y2016.PIN (Y2016)  
OPDR.TG.PRD.ETTW.RSAVER.DAF21.Y2017.PIN (Y2017)  
OPDR.TG.PRD.ETTW.RSAVER.DAF21.Y2018.PIN (Y2018)  
OPDR.TG.PRD.ETTW.RSAVER.DAF21.Y2019.PIN (Y2019)  
OPDR.TG.PRD.ETTW.RSAVER.DAF21.Y2020.PIN (Y2020)  
OPDR.TG.PRD.ETTW.RSAVER.DAF21.Y2021.PIN (Y2021)

c. DAF TKT Base

## B. RSA-911 verified SSN closure files, with PINs

**Description:** The RSA closure files for verified SSNs are modified versions of the RSA-911 files provided by the Department of Education (DOE) for fiscal years 1998 and onwards. There is one file for each fiscal year from 1998 through June 2017 containing demographic and programmatic data for applicants to RSA's VR program whose case was closed during a given fiscal year and one file from July 2017 onward, containing demographic and programmatic data for applicants to RSA's VR program with an active case during the calendar year and students who were receiving pre-employment transition services (pre-ETS) through the VR agency, even if not formally receiving VR services.

**Data usage information:** Note that permission from the Department of Education is required before using RSA data. Users should also take note of implications of the RSA-911 file structure. As the average length of enrollment in the VR program is two years, the fact that the pre-July 2017 data reflect case closures rather than case enrollments means that the file has what amounts to a built-in two-year lag. For example, if a participant entered the VR program in April 2004 and exited in October 2006, their VR participation information would be included only in the file for fiscal year 2007. There would be no record of their participation in VR in the files for 2004, 2005, or 2006.

Additionally, in the pre-July 2017 data, the format of the original RSA-911 source files changed, most notably in 2002 and 2014; new fields were added, and some old ones were dropped. Therefore, when merging multiple years of RSA data, variables that were new in 2002 will contain all missing values for the years before 2002; likewise, variables that were dropped in 2002 will have all missing values for all the years from 2002 onwards. Variables that were new in 2014 layout will contain all missing values for the years before 2014; likewise, variables that were dropped in 2014 will have all missing values for all the years from 2014 onwards.

In July 2017, the structure of RSA data underwent significant changes, with several data elements being significantly different than those in earlier versions. While it may be possible to use some of the elements across both the pre-July 2017 and post-July 2017 files to measure similar concepts, the Department of Education has not documented a crosswalk that formalizes the relationship across variables, and thus DAF users should proceed with caution.

A listing of all the variables in these modified RSA-911 closure files are available in Section V, along with the related element from the RSA-911 source files. For each variable, we include the original RSA element name and its corresponding SAS variable name. Some original RSA elements are converted to multiple SAS variables, such as the element “PUBLIC SUPPORT DURING VR,” which is converted to nine separate binary variables that are 0/1 indicators of whether each of nine types of public support were received or not (the nine binary variables are SSIAGED, SSIBLIND, SSIDISAB, AFDC, GENASSIST, SSDI, VETDISAB, OTRDISAB, and PTRPUBSUP). Additionally, some RSA elements take on a new format in the DAF-linkable file. For instance, all date elements are converted from text fields to SAS date variables.

**Data Documentation:** The documentation contains ten reporting manuals and associated policy directives for the RSA-911, including record layouts. The record layout changes four times: from 2001 to 2002, from 2013 to 2014, from June 2017 to July 2017, and finally from June 2020 to July 2020. In between those changes, the instructions and edit specifications may change with policy directive, without resulting changes in the record layout. Therefore, when accessing the RSA-911 source files, special attention should be paid to both the position and length of the variables described in each of the source file layouts. This is especially critical when the analysis covers a period during which the layout changed. It is also necessary to pay special attention to the possible variable values for each variable, as these can change from year to year. Each iteration of the RSA-911 documentation includes a summary of year-over-year changes.

**Variable to indicate availability of DAF data:** Each of these modified RSA-911 closure files contains a new variable, IN\_DAF, constructed to indicate whether the RSA participant is also in the DAF. A value of 1 indicates the RSA participant has a record in DAF, otherwise the variable has a value of 0.

**All RSA-911 Verified SSN Files with PINs** on the mainframe contain data for years 1998 and onwards. All file names are listed below and are also in the file of filenames:

OPDR.TG.PRD.ETTW.DAF21.FILES.NAMES.CURRENT

Note: permission from the Department of Education is required before using RSA data.

**All file names, with SAS member names in parentheses:**

OPDR.TG.PRD.ETTW.RSAVER.DAF21.RSA98.PIN (RSA98)

OPDR.TG.PRD.ETTW.RSAVER.DAF21.RSA99.PIN (RSA99)

OPDR.TG.PRD.ETTW.RSAVER.DAF21.RSA21.PIN (RSA21)

### C. DAF-Linkable RSA summary file, with PINs

**Description:** These files contain selected elements as described below from the RSA-911 files provided by DOE for fiscal years 1998 and June 2017. Selected elements from the RSA-911 files include VR program application, entry, and exit dates, agency code, and closure type. Since the RSA data was fundamentally changed in July 2017 to include data on applicants with open cases, there are two DAF-Linkable RSA Summary files, one covering the pre-July 2017 period and another covering the post-July 2017 period. In the pre-July 2017 summary file, an additional variable is created during the DAF construction process to indicate whether the participant received one of thirteen types of RSA services (pre-2002 period), one of 22 types of services (2002-2013 period), or one of 28 types of services (2014-June 2017 period) during their period of RSA enrollment.

Records from the RSA-911 files are included only if the RSA SSNs are verified by MPR-EVS processing using the NUMIDENT file for verification. Annual records from 1998 through June 2017 are rolled up to a single record per PIN in this DAF-linkable file. This file can be linked to the DAF using the PIN.

The pre-July 2017 DAF-Linkable RSA Summary File contains seven variables, each with up to 24 occurrences, plus the PIN variable for a total of 169 variables. These variables, except PIN, are described and mapped to the RSA source data in Table IV.1 below. The post-July 2017 DAF-Linkable RSA Summary file contains eight variables, each with up to 8 occurrences, plus the PIN variable for a total of 65 variables. These variables, except PIN, are described and mapped to the RSA source data in Table IV.2 below.

**Table IV.1. Variables in the RSA-DAF linkable summary file for the old format RSA file**

Variable name (n=1-24)	Variable label	RSA source element	Data processing notes
RSAAGYn	RSA Agency	Agency Code (pre-2002 #2, 2002-onward #1)	Pre-2002 records have an Agency Code field that is 3 positions long but contains only the two digit Agency Code from the original data.
RSACLTYn	RSA Closure Type	Type of Closure (pre-2002 #38, 2002-2013 #36, 2014-onward #213)	
RSADOAn	RSA Date of Application	Date of Application (#5)	
RSADOCn	RSA Date of Closure	Date of Closure (pre-2002 #40, 2002-216 #38, 2014-onward #215)	
RSADOEn	RSA Date of Eligibility Determination	Date of Eligibility Determination (pre-2002 #25, 2002-2013 #22, 2014 - onward #46)	
RSAIPEn	RSA Date of Individualized Plan for Employment	Date of Individualized Plan for Employment (pre-2002 n/a, 2002-2013 #23, 2014-onwards #49)	
RSASVSn	RSA Service Use Flag	Type of Services Provided (pre-2002 #31, 2002-2014 #25, 2014 - onwards ##51-190)	<p>Pre-2002: if any of the 13 Types of Services were received during the rehabilitation process (there is a 1 in that record position) then this variable is set to 1; otherwise, this variable is set to 0.</p> <p>2002-2013: if any of the 22 Types of Services were received during the rehabilitation process (there is something other than a '00' in that record position) then this variable is set to 1; otherwise, this variable is set to 0.</p> <p>2014-2017: if any of the 28 Types of Services were received during the rehabilitation process (there is something other than '0' in that record position) then this variable is set to 1; otherwise, this variable is set to 0.</p>

**Table IV.2. Variables in the RSA-DAF linkable summary file for the new format RSA file<sup>a</sup>**

Variable name (n=1-7) <sup>b</sup>	Variable label	RSA source element
RSAAGYn	RSA Agency	Agency Code (July 2017-onward #4)
RSADOAn	RSA Date of Application	Date of Application (July 2017-onward #7)
RSADOEn	RSA Date of Eligibility Determination	Date of Eligibility Determination (July 2017-onward #38)
RSADOEXTn	RSA Date of Exit	Date of Exit (July 2017-onward #353)
RSADOPREMPn	RSA Date of Pre-Employment Transition Service	Start Date of Pre-Employment Transition Services (July 2017-onward #96)
RSAEXTTYPn	RSA Exit Type	Type of Exit (July 2017-onward #354)
RSAIPEn	RSA Date of Individualized Plan for Employment	Date of Most Recent or Amended IPE (July 2017-December 2019 #48), Date of Initial IPE (January 2020 -onward #398)
RSASVSDTn	RSA Start Date of Initial VR Service	Start Date of Initial VR Service on or After IPE (#127)

<sup>a</sup> As we describe in Volume 2, the July 2017-onward file includes open VR cases and retains closed cases for 8 quarters after closure. Because of this, VR clients may have records in multiple files. To construct the linkable summary file, we identify the most recent record (using the REPORT\_THROUGH variable) for the observation, identified using SSN-Individual ID-Agency Code-Application Date. We assume that records that match on these values are the same case, with updated data for purposes of constructing this closure file.

<sup>b</sup> During DAF20 we discovered that some RSA spells were duplicated in the new format RSA data; we updated our processing to eliminate these duplicates resulting in one fewer occurrence of N-suffixed variables.

**Data usage information:** Permission from the Department of Education is required before using RSA data. Users should also take note of implications of the time lag in the RSA-911 file structure used as the source for this DAF-linkable file, at least for the period before July 2017. As the average length of enrollment in the VR program is two years, the fact that the RSA-911 data reflect case closures rather than case enrollments means that the source files have what amounts to a built-in two-year lag. For example, if a participant entered the VR program in April 2004 and exited in October 2006, their VR participation information would not be included in the RSA-911 files until fiscal year 2007. There would be no record of their participation in VR in the data for 2004, 2005, or 2006. Note that in July 2017, RSA-911 files now contain data for applicants with open VR cases, so this lag should not be a concern.

Each record in the DAF-linkable RSA Summary file is identified by the individual's PIN, stored in the variable PIN. This file can be merged to any of the components in the mini DAF for RSA participants on a one-to-one basis using the PIN. To merge RSA with any part of the DAF, use the PIN variable in the component to which it is being merged. As not every RSA participant is also an SSDI or SSI beneficiary, there may be records in the RSA data with no corresponding record in the DAF.

**Data documentation:** This documentation contains reporting manuals and associated policy directives for the RSA-911, including record layouts, in appendices. The specific variables included on these files as well as their corresponding RSA source element and data processing notes are in the table below.

**File name**, with SAS member name in parentheses:

1. OPDR.TG.PRD.ETTW.FINAL.DAF21P.RSAFLATOF(RSAFLAT)
2. OPDR.TG.PRD.ETTW.FINAL.DAF21P.RSAFLAT(RSAFLAT)

Note: permission from the Department of Education is required before using RSA data. The first file corresponds to the pre-July 2017 period, while the second file corresponds to the post-July 2017 period.

#### **D. DAF-Linkable LAUS and SAIPE files, with PINs**

**Description:** These files contain economic data from the LAUS and SAIPE for verified RSA participants who were also DAF beneficiaries. Records are included for every RSA participant who is also a DAF beneficiary whose RSA SSN (later replaced with PINs) is verified by MPR-EVS processing using the NUMIDENT file for verification. There is one file for each year from 1994 through the DAF year. Each record contains PIN, annual county-level poverty rates and median income from the SAIPE, and monthly county-level unemployment rates from the LAUS, for the county of residence identified in the DAF for the RSA participant.

**Data usage information:** The LAUS-SAIPE records with PINs can be linked to the RSA mini-DAF with PINs (file #1) or the RSA-911 Verified SSN Files with PINs (file #2) using the PINs in the LAUS-SAIPE file. SAIPE data is not available at the county-level for 1996, therefore the SAIPE variables in the 1996 file contain missing values. A table containing national and state-level poverty and median household income estimates for 1996 is available in Volume 2.

**Data documentation:** A list of all the variables in this file is available Section VI. Additional details may be found in Volume 3.

**These files use the following naming convention** (SAS member name in parentheses):

OPDR.TG.PRD.ETTW.RSAVER.DAF20.L<yyyy>.PIN(L<yyyy>)

**All DAF-Linkable LAUS and SAIPE files with PINs** on the mainframe contain data for years 1994 through the DAF year. All file names are listed below and are also in the file of filenames:

OPDR.TG.PRD.ETTW.DAF21.FILES.NAMES.CURRENT

**All file names, with SAS member names in parentheses:**

OPDR.TG.PRD.ETTW.RSAVER.DAF21.L1994.PIN (L1994)

OPDR.TG.PRD.ETTW.RSAVER.DAF21.L1995.PIN (L1995)

OPDR.TG.PRD.ETTW.RSAVER.DAF21.L2004.PIN (L2004)  
OPDR.TG.PRD.ETTW.RSAVER.DAF21.L2005.PIN (L2005)  
OPDR.TG.PRD.ETTW.RSAVER.DAF21.L2006.PIN (L2006)  
OPDR.TG.PRD.ETTW.RSAVER.DAF21.L2007.PIN (L2007)  
OPDR.TG.PRD.ETTW.RSAVER.DAF21.L2008.PIN (L2008)  
OPDR.TG.PRD.ETTW.RSAVER.DAF21.L2009.PIN (L2009)  
OPDR.TG.PRD.ETTW.RSAVER.DAF21.L2010.PIN (L2010)  
OPDR.TG.PRD.ETTW.RSAVER.DAF21.L2011.PIN (L2011)  
OPDR.TG.PRD.ETTW.RSAVER.DAF21.L2012.PIN (L2012)  
OPDR.TG.PRD.ETTW.RSAVER.DAF21.L2013.PIN (L2013)  
OPDR.TG.PRD.ETTW.RSAVER.DAF21.L2014.PIN (L2014)  
OPDR.TG.PRD.ETTW.RSAVER.DAF21.L2015.PIN (L2015)  
OPDR.TG.PRD.ETTW.RSAVER.DAF21.L2016.PIN (L2016)  
OPDR.TG.PRD.ETTW.RSAVER.DAF21.L2017.PIN (L2017)  
OPDR.TG.PRD.ETTW.RSAVER.DAF21.L2018.PIN (L2018)  
OPDR.TG.PRD.ETTW.RSAVER.DAF21.L2019.PIN (L2019)  
OPDR.TG.PRD.ETTW.RSAVER.DAF21.L2020.PIN (L2020)  
OPDR.TG.PRD.ETTW.RSAVER.DAF21.L2021.PIN (L2021)

## V. Details of the RSA-911 File Layouts

There are four layouts for the RSA data. The first (Table V.1) covers the period through 2001, the second (Table V.2) covers the period beginning 2002 through 2014, the third (Table V.3) covers 2014 through June 30, 2017, and the fourth (Table V.4) covers the period after July 1, 2017. Therefore, four tables are presented below. The first table provides the contents of the RSA-911 data pre-2002 and maps to variables in the DAF-RSA files. The second table does the same for the layout that covers the period from 2002 through 2014, and includes a column describing how the variable changed from the prior layout. The third table does the same for the layout that covers the period from 2014 to June 30, 2017. Variables that are present in only one period will have missing values for the other periods. Even when using the three variations of the pre-July 2017 RSA-911 data, special attention should be paid to variables that may have changed over time, including those potentially that were dropped or added, changed their format type, or had differing valid values.

The fourth table lists the layout and mapping to DAF variables for the period covering July 1, 2017 onward. Because the data elements in the newest version of the RSA-911 data are substantially different than those in the earlier version, and so we do not map elements to the earlier layouts. While it may be possible to use some of the elements across both the pre-July 2017 and post-July 2017 files to measure similar concepts, the Department of Education has not documented a crosswalk that formalizes the relationship across variables, and thus DAF users should proceed with caution. We do, however, show a concordance between the policy directive effective July 1, 2017 (PD-16-04) and the policy directive effective as of July 1, 2020 (PD-19-03). Specifically, we note which elements were dropped or added between the two layouts.

**Table V.1. DAF-RSA variables from pre-2002 RSA-911 layout**

**Table V.4. Map of DAF-RSA variables to 2017 – present layout**

Note: Because the data elements starting in the policy directive effective July 1, 2017 RSA-911 data are entirely different from previous versions, as is the universe of individuals contained in the file, we do not suggest attempting to align elements between the post-July 2017 and earlier RSA-911 data. Additionally, the RSA-911 files in July 2017 onward are being provided as CSV files instead of text files, meaning that the record position that we tracked for earlier versions no longer applies. Instead, we list the element number. Effective July 1, 2020, 94 data elements were eliminated in PD-19-03 (these are flagged with an asterisk), and 14 data elements were added (flagged with two asterisks). The layout for the other elements remains the same except that the new data elements have been added to the end of the file.

\* Element was contained in PD16-04 (effective July 1, 2017) but was dropped in PD19-03 (effective July 1, 2020). See Appendix E for more details. Data for this element is available only in 2017, 2018, and 2019 and should be used with caution.

\*\* Element was added in PD19-03 (effective July 1, 2020).

## VI. Variables in the DAF-Linkable LAUS and SAIPE Files

This section lists the variables in the LAUS-SAIPE files that contain economic data from the LAUS and SAIPE. There is one file for each year from 1994 onward and, with one exception, each record contains PIN, monthly county-level unemployment rates from the LAUS and annual county-level poverty rates and median income from the SAIPE, for the county of residence for each RSA participant that is also a SSDI or SSI beneficiary. The exception is the 1996 file, for which county-level SAIPE data is not available. The 1996 file therefore contains missing poverty-rate and median-income values for this year.

Each annual file for the LAUS-SAIPE data contains three sets of monthly variables, each set containing 12 variables, plus PIN, for a total of 37 variables. The sets of monthly variables are named according to the year and month that each represents. For example, the 2012 file contains variables as shown Table VI.1 where “2012” represents the year and the two terminal digits represent the months. Thus, the variable LAUS\_UNEMP201201 represents the monthly county-level LAUS statistic for January 2012, for the county in which the RSA participant resided during January 2012 while LAUS\_UNEMP201202 represents the monthly county-level LAUS statistic for February 2012 for the county in which the RSA participant who was also a SSDI or SSI beneficiary resided during February 2012.

**Table VI.1. LAUS SAIPE variables**

Contents of LAUS-SAIPE file for example year (2012)	
Variable name	Variable description
SSN/PIN	Social Security Number
LAUS_UNEMP201201	Monthly unemployment rate for Jan 2012, for county in which the RSA participant resided during Jan 2012
LAUS_UNEMP201202	Monthly unemployment rate for Feb 2012, for county in which the RSA participant resided during Feb 2012
LAUS_UNEMP201203	Monthly unemployment rate for Mar 2012, for county in which the RSA participant resided during March 2012
LAUS_UNEMP201204	Monthly unemployment rate for Apr 2012, for county in which the RSA participant resided during Apr 2012
LAUS_UNEMP201205	Monthly unemployment rate for May 2012, for county in which the RSA participant resided during May 2012
LAUS_UNEMP201206	Monthly unemployment rate for Jun 2012, for county in which the RSA participant resided during Jun 2012
LAUS_UNEMP201207	Monthly unemployment rate for Jul 2012, for county in which the RSA participant resided during Jul 2012
LAUS_UNEMP201208	Monthly unemployment rate for Aug 2012, for county in which the RSA participant resided during Aug 2012
LAUS_UNEMP201209	Monthly unemployment rate for Sep 2012, for county in which the RSA participant resided during Sep 2012
LAUS_UNEMP201210	Monthly unemployment rate for Oct 2012, for county in which the RSA participant resided during Oct 2012

**Table VI.1. LAUS SAIPE variables**

Contents of LAUS-SAIPE file for example year (2012)	
Variable name	Variable description
LAUS_UNEMP201211	Monthly unemployment rate for Nov 2012, for county in which the RSA participant resided during Nov 2012
LAUS_UNEMP201212	Monthly unemployment rate for Dec 2012, for county in which the RSA participant resided during Dec 2012
SAIPE_POV201201	Annual poverty level for 2012, for county in which the RSA participant resided during Jan 2012
SAIPE_POV201202	Annual poverty level for 2012, for county in which the RSA participant resided during Feb 2012
SAIPE_POV201203	Annual poverty level for 2012, for county in which the RSA participant resided during Mar 2012
SAIPE_POV201204	Annual poverty level for Apr 2012, for county in which the RSA participant resided during Apr 2012
SAIPE_POV201205	Annual poverty level for May 2012, for county in which the RSA participant resided during May 2012
SAIPE_POV201206	Annual poverty level for Jun 2012, for county in which the RSA participant resided during Jun 2012
SAIPE_POV201207	Annual poverty level for Jul 2012, for county in which the RSA participant resided during Jul 2012
SAIPE_POV201208	Annual poverty level for Aug 2012, for county in which the RSA participant resided during Aug 2012
SAIPE_POV201209	Annual poverty level for Sep 2012, for county in which the RSA participant resided during Sep 2012
SAIPE_POV201210	Annual poverty level for Oct 2012, for county in which the RSA participant resided during Oct 2012
SAIPE_POV201211	Annual poverty level for Nov 2012, for county in which the RSA participant resided during Nov 2012
SAIPE_POV201212	Annual poverty level for Dec 2012, for county in which the RSA participant resided during Dec 2012
SAIPE_INC201201	Annual median income for Jan 2012, for county in which the RSA participant resided during Jan 2012
SAIPE_INC201202	Annual median income for Feb 2012, for county in which the RSA participant resided during Feb 2012
SAIPE_INC201203	Annual median income for Mar 2012, for county in which the RSA participant resided during Mar 2012
SAIPE_INC201204	Annual median income for Apr 2012, for county in which the RSA participant resided during Apr 2012
SAIPE_INC201205	Annual median income for May 2012, for county in which the RSA participant resided during May 2012
SAIPE_INC201206	Annual median income for Jun 2012, for county in which the RSA participant resided during Jun 2012
SAIPE_INC201207	Annual median income for Jul 2012, for county in which the RSA participant resided during Jul 2012
SAIPE_INC201208	Annual median income for Aug 2012, for county in which the RSA participant resided during Aug 2012
SAIPE_INC201209	Annual median income for Sep 2012, for county in which the RSA participant resided during Sep 2012
SAIPE_INC201210	Annual median income for Oct 2012, for county in which the RSA participant resided during Oct 2012

**Table VI.1. LAUS SAIPE variables**

Contents of LAUS-SAIPE file for example year (2012)	
Variable name	Variable description
SAIPE_INC201211	Annual median income for Nov 2012, for county in which the RSA participant resided during Nov 2012
SAIPE_INC201212	Annual median income for Dec 2012, for county in which the RSA participant resided during Dec 2012

Other annual LAUS-SAIPE files contain variables in which the “2012” portion of the variable name is replaced by the year for that particular file. Thus, in the LAUS\_SAIPE file for 2011, the variable names would be SAIPE\_INC2012mm, the only difference being the presence of 2011 instead of 2012 in the variable name. The same variable name pattern holds true for all other LAUS-SAIPE files from 1994 onward.

## **Appendices A-E:**

### **See links in Section II**

These appendices are not contained in this version because the Department of Education produced the RSA policy directives and we have not verified that they are in section 508-compliant format. We have copies of these policy directives and will provide them to users 'as is' upon request (requests may be sent to [ORDES.DAF@ssa.gov](mailto:ORDES.DAF@ssa.gov)). Please see Section II for links to those files on the Department of Education website.

## **Appendix F:**

### **Details About the DAF-RSA Construction Process**

Step 1. Convert RSA-911 Files for 2018 to SAS Format	Notes
Program: M:\DAF20\TASK 17 Create DAF-RSA Files\Programs\Read_RSA_CSV.sas	Convert the raw RSA-911 file for 2020 from text to SAS format.
Inputs: M:\2020 RSA 911 raw file from Dept of Education\SSACY20.csv	File of original RSA-911 data for 2020, CSV format.
Outputs: M:\DAF20\RSA\upd\rsa20_newformat.sas7bdat M:\DAF20\RSA\upd\rsa20.sas7bdat (Sorted by SSN)	RSA-911 file for 2020, converted to SAS format and sorted by SSN.
Program: M:\DAF20\TASK 17 Create DAF-RSA Files\Programs\UPLOAD_RSA.sas	Manual upload of file to mainframe
Input: M:\DAF20\RSA\upd\rsa20.sas7bdat	RSA-911 file for 2020, converted to SAS format and sorted by SSN.
Output: OPDR.TG.PRD.ETTW.#6502.RSA20NEW.SA.V1(RSA20_Sorted)	RSA-911 file for 2020, uploaded to mainframe

Step 2. Combine All Years of RSA-911 Closure Files	Notes
Program: OPDR.TG.PRD.ETTW.#6502.DAF20.RSA.PRDLIB(RSACOMB)	Combine all years of RSA-911 SAS-loaded data. Also create files for EVS processing.
Inputs: 1. OPDR.TG.PRD.ETTW.#6502.DAF17P.RSAALLOF.SA.V1 (RSAALL) 2. OPDR.TG.PRD.ETTW.\$4671.DAF19.RSAALL.SA.V1(RSAALL) 3. OPDR.TG.PRD.ETTW.#6502.RSA20NEW.SA.V1 (RSA20_Sorted)	RSA-911 files for 1998 onwards, converted to SAS format. 1. A combined file of all years of old-format RSA data 2. A combined file of all years of new-format RSA data 3. Uploaded raw RSA-911 file for 2020
Outputs: 1. OPDR.TG.PRD.ETTW.#6502.DAF20.RSAALL.SA.V1 (RSAALL) 2. OPDR.TG.PRD.ETTW.#6502.DAF20P.RSAEVS.SA.V1 (RSAEVS) 3. OPDR.TG.PRD.ETTW.#6502.DAF20P.RSAFIN.FL.V1	1. A combined file of all years of RSA data in SAS format 2. File used for EVS, contains only SSN, birth year, gender with one record per SSN per birth year/gender 3. NUMIDENT finder file in text format, contains SSNs only.

Step 3. Process NUMIDENT Returns	Notes
<p>Program: OPDR.TG.PRD.ETTW.\$4671.DAF20.RSA.PRDLIB(READNUM)</p>	<p>We use NUMIDENT information to verify the SSNs which allows us to verify all SSNs in the RSA data, not just those with matching DAF records. We submit a finder file to the NUMIDENT, and when the finder results are returned, we prepare it for use in the EVS process.</p>
<p>Input: OPDR.TG.PRD.ETTW.DAF20.NUMI.Y21M0929</p>	<p>NUMIDENT finder return, text format.</p>
<p>Output: OPDR.TG.PRD.ETTW.\$4671.DAF20P.RSANUM.SA.V1 (RSANUM)</p>	<p>NUMIDENT data ready for use by EVS process, SAS format.</p>

Step 4. Run EVS	Notes
<p>Program: OPDR.TG.PRD.ETTW.\$4671.DAF20.RSA.PRDLIB(EVS)</p>	<p>We verify the RSA SSNs using the MPR EVS process as the lack of participants' names in the RSA data precludes the use of SSA's own EVS process. Only RSA records that verify are later matched to the DAF data. We verify RSA SSNs by comparing the SSN, Year of Birth and Sex from the RSA file with the SSN, DOB, and Sex from the processed NUMIDENT).</p> <p>All years of combined RSA data are run through EVS each year. This is because a single SSN can appear multiple times in the RSA data but sometimes with a different year of birth or gender code. Re-processing all SSNs through EVS every year ensures that an SSN that failed EVS in an earlier year due to an incorrect birth year might later pass if the correct birth year becomes available.</p> <p>EVS results (pass-fail) are attached to each RSA record for each year. When an SSN occurs in the RSA data multiple times with different birth years or gender codes, it is unlikely that all the SSN-birth year-gender combinations will be classified as verified.</p>
<p>Inputs: 1. OPDR.TG.PRD.ETTW.\$4671.DAF20P.RSANUM.SA.V1 (RSANUM) 2. OPDR.TG.PRD.ETTW.\$4671.DAF20P.RSAEVS.SA.V1 (RSAEVS)</p>	<ol style="list-style-type: none"> <li>1. NUMIDENT data prepared for EVS use, SAS format.</li> <li>2. RSA identifying variables to be verified, SAS format.</li> </ol>
<p>Outputs: 1. OPDR.TG.PRD.ETTW.\$4671.DAF20P.RSAEVS.RP.V1 2. OPDR.TG.PRD.ETTW.\$4671.DAF20P.RSAEVS.RS.V1 (MPR_EVS4)</p>	<ol style="list-style-type: none"> <li>1. Table of summary EVS results, text format.</li> <li>2. RSA identifying variables with EVS results attached, pass or fail, SAS format.</li> </ol>

Step 5. Merge EVS Results to RSA Data	Notes
Program: OPDR.TG.PRD.ETTW.\$4671.DAF20.RSA.PRDLIB (RSAEVS)	Merge EVS results (pass or fail) onto to all years of RSA-911 files adhering to new format RSA
Inputs: 1. OPDR.TG.PRD.ETTW.\$4671.DAF20P.RSAEVS.R.SA.V1 (MPR_EVS4) 2. OPDR.TG.PRD.ETTW.DAF18.RSANEW.SA.V1 (RSAALL) 3. OPDR.TG.PRD.ETTW.#6502.RSA19NEW.SA.V1 (RSAALL) 4. OPDR.TG.PRD.ETTW.#6502.RSA20NEW.SA.V1 (RSAALL)	1. All RSA SSNs with EVS result, pass or fail, SAS format. 2.-3. RSA-911 data, 2018-2020, all RSA variables, SAS format.
Output: 1. OPDR.TG.PRD.ETTW.\$4671.DAF20P.RSAVER18.SA.V1 (RSAVER18) 2. OPDR.TG.PRD.ETTW.\$4671.DAF20P.RSAVER19.SA.V1 (RSAVER19) 3. OPDR.TG.PRD.ETTW.\$4671.DAF20P.RSAVER20.SA.V1 (RSAVER20)	RSA data, 2018-2020, all variables, with EVS code attached (pass or fail) adhering to new format RSA
Program: OPDR.TG.PRD.ETTW.\$4671.DAF20.RSA.PRDLIB (RSAEVSOF)	Merge EVS results (pass or fail) onto to all years of RSA-911 files, adhering to old format RSA
Inputs: 1. OPDR.TG.PRD.ETTW.\$4671.DAF20P.RSAEVS.R.SA.V1 (MPR_EVS4) 2. OPDR.TG.PRD.ETTW.#6502.DAF17P.RSAALLOF.SA.V1 (RSAALL)	1. All RSA SSNs with EVS result, pass or fail, SAS format. 2. Pre-2018 RSA-911 data, all years combined, all RSA variables, SAS format.
Output: OPDR.TG.PRD.ETTW.\$4671.DAF20P.RSAVEROF.SA.V1 (RSAVERCD)	RSA data, all years combined, all variables, with EVS code attached (pass or fail).

Step 6. Create DAF-Linkable RSA Summary File, with SSNs	Notes
Program: OPDR.TG.PRD.ETTW.\$4671.DAF20.RSA.PRDLIB(RSAFLAT)	Roll up annual RSA-911 records from 2018-2020 to a single record. Extract only selected variables.
Input: 1. OPDR.TG.PRD.ETTW.\$4671.DAF20P.RSAVER18.SA.V1 (RSAVER18) 2. OPDR.TG.PRD.ETTW.\$4671.DAF20P.RSAVER19.SA.V1 (RSAVER19) 3. OPDR.TG.PDR.ETTW.\$4671.DAF20P.RSAVER20.SA.V1 (RSAVER20)	RSA data, 2018-2020, all variables, with EVS code attached (pass or fail).
Output: OPDR.TG.PRD.ETTW.FINAL.DAF20P.RSAFLAT(RSAFLAT)	<ul style="list-style-type: none"> <li>• RSA records are rolled up to one record per SSN.</li> <li>• Records are selected for output only if RSA SSN is verified.</li> </ul>
Program: OPDR.TG.PRD.ETTW.\$4671.DAF20.RSA.PRDLIB(RSAFLAOF)	Roll up annual RSA-911 records from 1998 to 2017 to a single record. Extract only selected variables.
Input: OPDR.TG.PRD.ETTW.\$4671.DAF20P.RSAVEROF.SA.V1 (RSAVERCD)	Pre-2018 RSA data, all years combined, all variables, with EVS code attached (pass or fail).
Output: OPDR.TG.PRD.ETTW.DRAFT.DAF20P.RSAFLAOF (RSAFLAT)	<ul style="list-style-type: none"> <li>• RSA records are rolled up to one record per SSN.</li> <li>• Records are selected for output only if RSA SSN is verified.</li> </ul>

Step 7. Create List of Verified RSA SSNs	Notes
Program: OPDR.TG.PRD.ETTW.\$4671.DAF20.RSA.PRDLIB(VERRSA)	Create list of verified SSNs from RSA data
Input: 1. OPDR.TG.PRD.ETTW.\$4671.DAF20P.RSAVEROF.SA.V1 (RSAVERCD) 2. OPDR.TG.PRD.ETTW.\$4671.DAF20P.RSAVER18.SA.V1 (RSAVER18) 3. OPDR.TG.PRD.ETTW.\$4671.DAF20P.RSAVER19.SA.V1 (RSAVER19) 4. OPDR.TG.PRD.ETTW.\$4671.DAF20P.RSAVER20.SA.V1 (RSAVER20)	RSA data, all years combined, all variables, with EVS code attached (pass or fail). 1. Combined pre-2018 RSA records 2.-3. Annual RSA data (2018-2020)
Output: OPDR.TG.PRD.ETTW.\$4671.DAF20P.VERRSA.SA.V1 (VERRSA)	<ul style="list-style-type: none"> <li>• List of verified RSA SSNs.</li> <li>• RSA SSNs that could not be verified are not included in this file.</li> </ul>

Step 8. Create Demo for RSA Mini-DAF, with SSNs	Notes
<p>Program: OPDR.TG.PRD.ETTW.\$6266.DAF20.RSADAF.PRDLIB(DMG)</p>	<p>Verified RSA records are matched to DAF Demo. Records are selected for output if;</p> <ul style="list-style-type: none"> <li>• RSA SSNs match DAF Demographic file AND</li> <li>• RSA SSNs are verified</li> </ul>
<p>Inputs: 1. OPDR.TG.PRD.ETTW.FINAL.DAF20P.DMG (DMG) 2. OPDR.TG.PRD.ETTW.\$4671.DAF20P.VERRSA.SA.V1 (VERRSA)</p>	<ol style="list-style-type: none"> <li>1. DMG from DAF</li> <li>2. List of verified RSA SSNs</li> </ol>
<p>Outputs: 1. OPDR.TG.PRD.ETTW.FINAL.RSA.DAF20.DMG(DMG) 2. OPDR.TG.PRD.ETTW.\$6266.RSADAF.SSN2-.SA.V1 (SSN)</p>	<p>All variables from DAF Demo are output for verified RSA records. File contains no PII except for SSNs. Other PII variables were removed: CAN, BGN, BLN, BMI, FRSTNAME, LASTNAME, NAMESUFFIX, HUN, and DUNS.</p> <ol style="list-style-type: none"> <li>1. Demo portion of the RSA Mini-DAF.</li> <li>2. List of SSNs in the RSA Mini-DAF.</li> </ol>

Step 9. Create TKT Base and Annuals for RSA Mini-DAF, with SSNs	Notes
<p>Programs:</p> <ol style="list-style-type: none"> <li>OPDR.TG.PRD.ETTW.\$6266.DAF20.RSADAF.PRDLIB(JCLTKT) AND</li> <li>OPDR.TG.PRD.ETTW.\$6266.DAF20.RSADAF.PRDLIB(TKTANN)</li> <li>OPDR.TG.PRD.ETTW.\$6266.DAF20.RSADAF.PRDLIB(TKTBASE)</li> </ol>	<p>Verified RSA records are matched to DAF TKT files (Base and Annuals). Records are selected for output if;</p> <ul style="list-style-type: none"> <li>RSA SSNs match DAF TKT files AND</li> <li>RSA SSNs are verified</li> </ul>
<p>Inputs:</p> <ol style="list-style-type: none"> <li>OPDR.TG.PRD.ETTW.\$4671.DAF20P.VERRSA.SA.V1 (VERRSA)</li> <li>OPDR.TG.PRD.ETTW.FINAL.DAF20P.TICKETBS (TICKETBS)</li> <li>OPDR.TG.PRD.ETTW.FINAL.DAF20P.TICKETyy where yy=02-09</li> </ol>	<ol style="list-style-type: none"> <li>List of verified RSA SSNs.</li> <li>DAF20 TKT Base</li> <li>-20. DAF20 TKT Annuals 2002 thru 2020</li> </ol>
<p>Outputs:</p> <ol style="list-style-type: none"> <li>OPDR.TG.PRD.ETTW.FINAL.RSA.DAF20.TKTBS (TKTBASE)</li> <li>OPDR.TG.PRD.ETTW.FINAL.RSA.DAF20.TKTyy where yy=02-20</li> </ol>	<p>All variables from DAF TKT Base and Annual files are output for verified RSA records. Files contain no PII except for SSNs. The only PII variable was removed from TKT Base: DUNS. Output files are the TKT Base and TKT Annuals portions of the mini-DAF for RSA participants.</p> <ol style="list-style-type: none"> <li>TKT Base portion of the mini-DAF for RSA participants.</li> <li>-20. TKT Annuals portion of the mini-DAF for RSA participants.</li> </ol>

Step 10. Create Annuals and LAUS/SAIPE for RSA Mini-DAF, with SSNs	Notes
<p>Programs:</p> <ol style="list-style-type: none"> <li>OPDR.TG.PRD.ETTW.\$6266.DAF20.RSADAF.PRDLIB (JCLANN)</li> <li>OPDR.TG.PRD.ETTW.\$6266.DAF20.RSADAF.PRDLIB (ANN)</li> </ol>	<p>Verified RSA records are matched to DAF Annuals. Records are selected for output if;</p> <ul style="list-style-type: none"> <li>RSA SSNs match DAF Annuals AND</li> <li>RSA SSNs are verified</li> </ul>
<p>Inputs:</p> <ol style="list-style-type: none"> <li>OPDR.TG.PRD.ETTW.\$4671.DAF20P.VERRSA.SA.V1 (VERRSA)</li> <li>OPDR.TG.PRD.ETTW.FINAL.DAF20P.YyyyyE(Yyyyy) where yyyy = 1994 thru 2020</li> <li>OPDR.TG.PRD.ETTW.FINAL.DAF20P.LAUS.FMTLIB</li> <li>OPDR.TG.PRD.ETTW.FINAL.DAF20P.SAIPE.FMTLIB</li> </ol>	<ol style="list-style-type: none"> <li>List of verified RSA SSNs.</li> <li>DAF20 Annuals 1994 thru 2020.</li> <li>DAF20 LAUS format library</li> <li>DAF20 SAIPE format library</li> </ol>
<p>Outputs:</p> <ol style="list-style-type: none"> <li>OPDR.TG.PRD.ETTW.FINAL.RSA.DAF20.Yyyyy (Yyyyy) where yyyy = 1994 thru 2020</li> <li>OPDR.TG.PRD.ETTW.FINAL.RSA.DAF20.Lyyyy (Lyyyy) where yyyy = 1994 thru 2020</li> </ol>	<p>All variables from DAF Annuals are output for verified RSA records. Files contain no PII except for SSNs.</p> <ol style="list-style-type: none"> <li>Annuals portion of the mini-DAF for RSA participants.</li> <li>LAUS/SAIPE portion of the mini-DAF for RSA participants.</li> </ol>

Step 11. Create VRRMS file for RSA Mini-DAF, with SSNs	Notes
<p>Program: OPDR.TG.PRD.ETTW.\$6266.DAF20.RSADAF.PRDLIB (VRRMS)</p>	<p>Verified RSA records are matched to DAF VRRMS. Records are selected for output if;</p> <ul style="list-style-type: none"> <li>• RSA SSNs match DAF VRRMS file AND</li> <li>• RSA SSNs are verified</li> </ul>
<p>Inputs: 1. OPDR.TG.PRD.ETTW.FINAL.DAF20P.VRRMS (VRRMS) 2. OPDR.TG.PRD.ETTW.FINAL.DAF20P.VRRMS.HIST (VRRMS) 3. OPDR.TG.PRD.ETTW.#4671.DAF20P.VERRSA.SA.V1 (VERRSA)</p>	<ol style="list-style-type: none"> <li>1. VRRMS from DAF</li> <li>2. Historical VRRMS from DAF</li> <li>3. List of verified RSA SSNs</li> </ol>
<p>Outputs: 1. OPDR.TG.PRD.ETTW.FINAL.RSA.DAF20.VRRMS (VRRMS) 2. OPDR.TG.PRD.ETTW.FINAL.RSA.DAF20.VRRMS.HIST (VRRMS)</p>	<p>All variables from VRRMS file are output for verified RSA records. File contains no PII except for SSNs. The following PII variables were removed from VRRMS.HIST file: C_1ST_NAME, C_LAST_NAME, C_XREF_SSN. The following PII variables were removed from VRRMS file: CLNT_FNM, CLNT_LNM, CLNT_MNM</p> <ol style="list-style-type: none"> <li>1. VRRMS of the RSA Mini-DAF.</li> <li>2. Historical VRRMS of the RSA Mini-DAF</li> </ol>
Step 13. Create PAYMENT files for RSA Mini-DAF, with SSNs	Notes
<p>Program: OPDR.TG.PRD.ETTW.\$6266.DAF20.RSADAF.PRDLIB (ENPAY)</p>	<p>Verified RSA records are matched to DAF Payment files. Records are selected for output if;</p> <ol style="list-style-type: none"> <li>1. RSA SSNs match DAF Payment files AND</li> <li>2. RSA SSNs are verified</li> </ol>
<p>Inputs: 1. OPDR.TG.PRD.ETTW.FINAL.DAF20P.ENPAY (ENPAY) 2. OPDR.TG.PRD.ETTW.FINAL.DAF20P.ENPAYVER (ENPAYVER) 3. OPDR.TG.PRD.ETTW.\$4671.DAF20P.VERRSA.SA.V1 (VERRSA)</p>	<ol style="list-style-type: none"> <li>1. Horizontal payment file from DAF</li> <li>2. Vertical payment file from DAF</li> <li>3. List of verified RSA SSNs</li> </ol>
<p>Outputs: 1. OPDR.TG.PRD.ETTW.FINAL.RSA.DAF20.ENPAY (ENPAY) 2. OPDR.TG.PRD.ETTW.FINAL.RSA.DAF20.ENPAV (ENPAYVER)</p>	<p>All variables from DAF payment files are output for verified RSA records.</p> <ol style="list-style-type: none"> <li>1. Payment Horizontal file of the RSA Mini-DAF.</li> <li>2. Payment Vertical file of the RSA Mini-DAF</li> </ol>

Step 14. Create RSA-911 Verified SSN Closure Files, with SSNs	Notes
<p>Program:            OPDR.TG.PRD.ETTW.\$6266.DAF20.RSADAF.PRDLIB (RSA)            OPDR.TG.PRD.ETTW.\$6266.DAF20.RSADAF.PRDLIB (RSALABEL)</p>	<p>Verified RSA SSNs are matched to the SAS-loaded versions of the RSA-911 Closure files.            New variable IN_DAF is created to indicate whether there is a corresponding DAF record for the RSA participant.            Conditions for record selection are:</p> <ul style="list-style-type: none"> <li>The SSN in the RSA-911 Closure data is a verified SSN.</li> </ul>
<p>Inputs:</p> <ol style="list-style-type: none"> <li>OPDR.TG.PRD.ETTW.\$4671.DAF20P.VERRSA.SA.V1 (VERRSA)</li> <li>OPDR.TG.PRD.ETTW.\$6266.RSADAF.SSN20.SA.V1 (SSN)</li> <li>OPDR.TG.PRD.ETTW.#3592.RSA98.SA.V1 (RSA98)</li> <li>OPDR.TG.PRD.ETTW.#3592.RSA99.SA.V1 (RSA99)</li> <li>OPDR.TG.PRD.ETTW.#3592.RSA00.SA.V1 (RSA00)</li> <li>OPDR.TG.PRD.ETTW.#3592.RSA01.SA.V1 (RSA01)</li> <li>OPDR.TG.PRD.ETTW.#3592.RSA02.SA.V1 (RSA02)</li> <li>OPDR.TG.PRD.ETTW.#3592.RSA03.SA.V1 (RSA03)</li> <li>OPDR.TG.PRD.ETTW.#3592.RSA04.SA.V1 (RSA04)</li> <li>OPDR.TG.PRD.ETTW.#3592.RSA05.SA.V1 (RSA05)</li> <li>OPDR.TG.PRD.ETTW.#3592.RSA06.SA.V1 (RSA06)</li> <li>OPDR.TG.PRD.ETTW.#3592.RSA07.SA.V1 (RSA07)</li> <li>OPDR.TG.PRD.ETTW.#3592.RSA08.SA.V1 (RSA08)</li> <li>OPDR.TG.PRD.ETTW.#3592.RSA09.SA.V1 (RSA09)</li> <li>OPDR.TG.PRD.ETTW.#3592.RSA10.SA.V1 (RSA10)</li> <li>OPDR.TG.PRD.ETTW.#3592.RSA11.SA.V1 (RSA11)</li> <li>OPDR.TG.PRD.ETTW.#3592.RSA12.SA.V1 (RSA12)</li> <li>OPDR.TG.PRD.ETTW.#3590.RSA13.SA.V1 (RSA13)</li> <li>OPDR.TG.PRD.ETTW.#6502.RSA14.SA.V1 (RSA14)</li> <li>OPDR.TG.PRD.ETTW.#6266.RSA15.SA.V1 (RSA15)</li> <li>OPDR.TG.PRD.ETTW.#6266.RSA16.SA.V1 (RSA16)</li> <li>OPDR.TG.PRD.ETTW.#6502.RSA17OLD.SA.V1(RSA17)</li> <li>OPDR.TG.PRD.ETTW.DAF18.RSANEW.SA.V1(RSA18_NE WFORMAT)</li> <li>OPDR.TG.PRD.ETTW.#6502.RSA19NEW.SA.V1 (RSA19_SORTED)</li> <li>OPDR.TG.PRD.ETTW.\$6502.RSA20.NEW.SA.V1 (RSA20_SORTED)</li> </ol>	<ol style="list-style-type: none"> <li>List of verified RSA SSNs</li> <li>List of SSNs in the RSA Mini-DAF.</li> <li>-24. Raw (SAS-loaded) RSA files.</li> </ol>
<p>Outputs:</p> <ol style="list-style-type: none"> <li>OPDR.TG.PRD.ETTW.FINAL.RSA.DAF20.RSAyy where yy=98-20</li> </ol>	<p>All variables from RSA raw files are output, but only for verified RSA records.            1.-22. RSA yearly files, for RSA verified SSNs, 1998 thru 2019. Note: these files contain only verified RSA SSNs, of which there are two types:</p> <ul style="list-style-type: none"> <li>RSA SSNs with match in DAF</li> <li>RSA SSNs with no match in DAF.</li> </ul> <p>The variable IN_DAF indicate whether there is a corresponding DAF record for the RSA participant.</p>

Step 15. Create a comprehensive list of SSNs to be pinned	Notes
<p>Program: OPDR.TG.PRD.ETTW.\$6266.DAF20.RSADAF.PRDLIB (RSASSNLT)</p>	<p>Pulls the list of all SSNs in DAF20 to be replaced with PINs</p>
<p>Inputs:</p> <ol style="list-style-type: none"> <li>1. OPDR.TG.PRD.ETTW.FINAL.DAF20P.DMG (DMG)</li> <li>2. OPDR.TG.PRD.ETTW.FINAL.DAF20P.ENPAY (ENPAY_FINAL)</li> <li>3. OPDR.TG.PRD.ETTW.FINAL.DAF20P.VRRMS (VRRMS)</li> <li>4. OPDR.TG.PRD.ETTW.FINAL.DAF20P.VRRMS.HIST (VRRMS)</li> <li>5. OPDR.TG.PRD.ETTW.FINAL.DAF20P.TICKETBS (TKTBS)</li> <li>6. OPDR.TG.PRD.ETTW.#6502.DAF20P.RSAEVS.SA.V1 (RSAEVS)</li> </ol>	<p>All input files are from the DAF, their SSNs compiled into a singular list.</p> <ol style="list-style-type: none"> <li>1. Demo file</li> <li>2. Horizontal payment file</li> <li>3. VRRMS file</li> <li>4. Historical VRRMS file</li> <li>5. TKT Base portion file</li> <li>6. RSA EVS file</li> </ol>
<p>Output:</p> <ol style="list-style-type: none"> <li>1. OPDR.TG.PRD.ETTW.\$6266.DAF20P.SSNLIST (SSNLIST)</li> </ol>	<ol style="list-style-type: none"> <li>1. List of SSNs to be replaced with PINs</li> </ol>

Step 16. Create & Apply PINs	Notes
<p>Programs:</p> <ol style="list-style-type: none"> <li>1. OPDR.TG.PRD.ETTW.\$6266.DAF20.RSADAF.PRDLIB (JCLPIN)</li> <li>2. OPDR.TG.PRD.ETTW.\$6266.DAF20.RSADAF.PRDLIB (CRPIN)</li> </ol>	<p>All programs to create and apply PINs are run by Paul O’Leary at SSA. Using the list of PINs created for the previous DAF, new PINs are created for the SSNs of new RSA participants.</p>
<p>Inputs:</p> <ol style="list-style-type: none"> <li>1. OPDR.TG.PRD.RTWR.DAF19P.ALLPINS.FORTRF19 (ALL_TRF18_DEMO_PINS)</li> <li>2. OPDR.TG.PRD.ETTW.#6266.DAF20P.SSNLIST (SSNLIST)</li> </ol>	<ol style="list-style-type: none"> <li>1. List of PINs created for all SSNs in DAF19</li> <li>2. List of SSNs for DAF20</li> </ol>
<p>Output:</p> <ol style="list-style-type: none"> <li>1. OPDR.TG.PRD.RTWR.DAF20P.ALLPINS.FORTRF20 (ALL_TRF19_DEMO_PINS)</li> </ol>	<ol style="list-style-type: none"> <li>1. List of PINs created for all SSNs in DAF20</li> </ol>

Step 17. Apply PINs	Notes
<p>Programs:</p> <ol style="list-style-type: none"> <li>1. OPDR.TG.PRD.ETTW.#6266.DAF20.RSADEID.PRDLIB (JCLPIN)</li> <li>2. OPDR.TG.PRD.ETTW.#6266.DAF20.RSADEID.PRDLIB (APPPIN)</li> </ol>	<p>All programs to create and apply PINs are run by Paul O’Leary at SSA. The PINs are used to replace the SSNs in all RSA-DAF de-identified files.</p>
<p>Inputs:</p> <ol style="list-style-type: none"> <li>1. OPDR.TG.PRD.RTWR.DAF19P.ALLPINS.FORTRF19 (ALL_TRF19_DEMO_PINS)</li> <li>2. RSA Mini-DAF with SSNs: Demo, Annuals (1994 to 2020), Tkt Base, and Tkt Annuals (2002 to 2020)</li> <li>3. RSA-911 Verified SSN Closure Files, with SSNs: Files for fiscal years 1998 to 2020</li> <li>4. DAF-Linkable LAUS-SAIPE Files, with SSNs Files for years 1994 to 2020</li> <li>5. DAF-Linkable VRRMS File, with SSNs</li> <li>6. DAF-Linkable Payment Files, with SSNs</li> <li>7. DAF-Linkable RSA Summary Files, with SSNs</li> </ol>	<ol style="list-style-type: none"> <li>1. List of PINs created for all SSNs in DAF19.</li> <li>2. RSA Mini-DAF contains records for verified RSA participants only.</li> <li>3. These RSA-911 files contain records only for verified RSA participants. Not all RSA participants are also DAF participants and therefore not all records in these files have a match in the RSA Mini-DAF.</li> <li>4. DAF-Linkable LAUS-SAIPE files contain records for RSA participants.</li> <li>5. DAF-Linkable VRRMS File contains records for RSA participants.</li> <li>6. DAF-Linkable Payment Files contain records for RSA participants.</li> <li>7. DAF-Linkable RSA Summary files</li> </ol>
<p>Outputs:</p> <ol style="list-style-type: none"> <li>1. RSA Mini-DAF with PINs: Demo, Annuals (1994 to 2020), Tkt Base, and Tkt Annuals (2002 to 2020)</li> <li>2. RSA-911 Verified SSN Closure Files, with PINs: Files for fiscal years 1998 to 2020</li> <li>3. DAF-Linkable LAUS-SAIPE Files, with PINs Files for years 1994 to 2020</li> <li>4. DAF-Linkable VRRMS File, with PINs</li> <li>5. DAF-Linkable Payment Files, with PINs</li> <li>6. DAF-Linkable RSA Summary Files, with PINs</li> </ol>	<ol style="list-style-type: none"> <li>1. RSA Mini-DAF contains records for verified RSA participants only. It contains no PII.</li> <li>2. These RSA-911 files contain records only for verified RSA participants. Not all RSA participants are also DAF participants and therefore not all records in these files have a match in the RSA Mini-DAF. There is no PII.</li> <li>3. LAUS-SAIPE files contain records for RSA participants. There is no PII.</li> <li>4. VRRMS File contains records for RSA participants. There is no PII.</li> <li>5. Payment Files contain records for RSA participants. There is no PII.</li> <li>6. RSA Summary Files contain records for RSA participants. There is no PII.</li> </ol>

## Issues Identified When Processing RSA Data

### *Gender Variable in RSA-911 Files*

Raw RSA data for 2002 through 2007 provided by DOE to SSA were found to have gender codes reversed for certain agencies in Illinois, specifically agencies 12, 5E, 016, and 072. We applied a fix by reversing the gender codes for the years in question using the SAS code below:

```
IF AGENCY IN ('12','5E','016','072')
    AND RSAYR IN ('02','03','04','05','06','07') THEN DO;
    IF RSASEX='1' THEN RSASEX='2';
    ELSE IF RSASEX='2' THEN RSASEX='1';
END;
```

We performed an additional gender check for Illinois agencies to be sure that the gender codes were fixed. The fix to the gender codes has been applied to raw RSA data stored at SSA and used to build the combined DAF-RSA files.

### *Incorrect SAS Format*

During the DAF12 processing cycle, we discovered that two variables were incorrectly read from the RSA-911 raw data files. The RSA element “The Hours Worked at Closure” (CLSHRSWK) was incorrectly converted from the RSA-911 source files for fiscal year 1998-2012 and the element “Hours Worked at Application” (APPHRSWK) was incorrectly read from the RSA-911 files for fiscal year 1998-2001. Both variables were converted to SAS format using the incorrect length and these errors resulted in unusable variables in the resulting DAF-RSA files and have been present in all TRF/DAF versions through DAF11 but had gone unnoticed. This issue has been corrected from DAF12 onward.
