B1.6 (2025) Progressive price indexing (30th percentile) of PIA factors beginning with individuals newly eligible for OASI benefits in 2025: Create a new bend point at the 30th percentile of the AIME distribution of newly retired workers. Maintain current-law benefits for earners at the 30th percentile and below. Reduce the 32 and 15 percent factors above the 30th percentile such that the initial benefit for a worker with AIME equal to the taxable maximum grows by inflation rather than the growth in the SSA average wage index. Disabled workers are: (a) not affected prior to normal retirement age; and (b) subject to a proportional reduction in benefits, based on the worker's years of disability, upon conversion to retired-worker beneficiary status. Young survivors (children of deceased workers and surviving spouses with a child in care) are not affected.	2021	-3.54	-4.34	1.46	3.74	41%	86%	
B1.6 (2030) Progressive price indexing (30th percentile) of PIA factors beginning with individuals newly eligible for OASI benefits in 2030: Create a new bend point at the 30th percentile of the AIME distribution of newly retired workers. Maintain current-law benefits for earners at the 30th percentile and below. Reduce the 32 and 15 percent factors above the 30th percentile such that the initial benefit for a worker with AIME equal to the taxable maximum grows by inflation rather than the growth in the SSA average wage index. Disabled workers are: (a) not affected prior to normal retirement age; and (b) subject to a proportional reduction in benefits, based on the worker's years of disability, upon conversion to retired-worker beneficiary status.	2021	-3.54	-4.34	1.23	3.51	35%	81%	
B1.7 Progressive price indexing (40th percentile) of PIA factors for individuals newly eligible for OASI benefits in 2029 through 2066: Create a new bend point at the 40th percentile of the AIME distribution of newly retired workers. Maintain current-law benefits for earners at the 40th percentile and below. Reduce the 32 and 15 percent factors above the 40th percentile such that the initial benefit for a worker with AIME equal to the taxable maximum grows by inflation rather than the growth in the SSA average wage index. Disabled workers are: (a) not affected prior to normal retirement age; and (b) subject to a proportional reduction in benefits, based on the worker's years of disability, upon conversion to retired-worker beneficiary status. B1.8 Progressive price indexing (50th percentile) of PIA factors for individuals newly eligible for OASI benefits in 2026 through 2065: Create a new bend point at the 50th percentile of the AIME distribution of newly retired workers. Maintain current-law benefits for earners at the 50th percentile and below. Reduce the 32 and 15 percent factors above the 50th percentile such that the initial benefit for a worker with AIME equal to the taxable maximum grows by inflation rather than the growth in the SSA average wage index. Disabled workers are: (a) not affected prior to normal retirement age; and (b) subject to a proportional reduction in benefits, based on the worker's years of disability, upon conversion to retired-worker beneficiary status.	2021	-3.54	-4.34	0.98	2.23	28%	51%	
B3.1 Beginning with those newly eligible for OASDI benefits in 2018, multiply the 32 and 15 percent PIA factors each year by 0.987. Stop reductions after 2048, when the factors reach 21 percent and 10 percent, respectively.	2017	-2.83	-4.48	1.54	2.96	54%	66%	
B3.2 Beginning with those newly eligible for OASI benefits in 2025, multiply the 90 and 32 percent PIA factors each year by 0.9925 and 0.982, respectively. Stop reductions after 2062. Beginning with those newly eligible for OASI benefits in 2020, multiply the 15 factor by 0.982. Stop reduction of the 15 factor after 2057. Disabled workers are: (a) not affected prior to normal retirement age; and (b) subject to a proportional reduction in benefits, based on the worker's years of disability, upon conversion to retired-worker beneficiary status. Child beneficiaries and spouses with a child in care under the OASI program are not affected by this proposal.	2017	-2.83	-4.48	2.05	5.26	72%	117%	
B3.3 Beginning with those newly eligible for OASDI benefits in 2018, use a modified primary insurance amount (PIA) formula. The modified formula: (1) increases the first bend point to the equivalent of \$800 in 2009 (about \$952 in 2017); (2) places a new bend point 75 percent of the way between the reset first bend point and the current-law second bend point; (3) lowers the PIA factor between the new bend point and the upper bend point from 32 percent to 20 percent; and (4) lowers the factor above the upper bend point from 15 percent to 10 percent.	2017	-2.83	-4.48	0.22	0.29	8%	7%	
B3.4 Beginning with those newly eligible for OASDI benefits in 2021, multiply all PIA factors each year by 0.991. Stop reductions after 2049. Disabled workers are: (a) not affected prior to normal retirement age; and (b) subject to a proportional reduction in benefits, based on the worker's years of disability, upon conversion to retired-worker beneficiary status. Young survivors (children of deceased workers and surviving spouses with a child in care) are not affected.	2017	-2.83	-4.48	1.50	3.15	53%	70%

C1.5 Starting in 2022, allow workers to choose whether to have their payroll tax rate reduced by 2 percentage points. For each calendar year that a worker chooses to have their payroll tax reduced, their normal retirement age (NRA) increases 1 month. We assume 2/3 of workers each year will choose this payroll reduction. The General Fund of the Treasury reimburses the OASI and DI Trust Funds for the reduction in payroll tax revenue.	2021	-3.54	-4.34	0.69	1.21	20%	28%
