

FAST FACTS & FIGURES ABOUT SOCIAL SECURITY, 2013

**Social Security Administration
Office of Retirement and Disability Policy
Office of Research, Evaluation, and Statistics
500 E Street, SW, 8th Floor
Washington, DC 20254**

**SSA Publication No. 13-11785
Released: August 2013**

DID YOU KNOW THAT...

- ✓ SSA paid benefits to about 61.9 million people in 2012
- ✓ Social Security provided at least half the income for 64 percent of the aged beneficiaries in 2011
- ✓ Social Security benefits were awarded to about 5.7 million people in 2012
- ✓ Women accounted for 55 percent of adult Social Security beneficiaries in 2012
- ✓ The average age of disabled-worker beneficiaries was 53.2 in 2012
- ✓ Eighty-six percent of SSI recipients received payments because of disability or blindness in 2012

Fast Facts & Figures answers the most frequently asked questions about the programs SSA administers. It highlights basic program data for the Social Security (retirement, survivors, and disability) and Supplemental Security Income programs. Most of the data come from the *Annual Statistical Supplement to the Social Security Bulletin*, which contains more than 240 detailed tables. The information on the income of the aged is from the data series *Income of the Population 55 or Older*. Data on trust fund operations are from the 2013 Trustees Report.

The tables and charts illustrate the range of program beneficiaries, from the country's oldest to its youngest citizens. In all, about 61.9 million people receive some type of benefit or assistance.

Shirley Turpin prepared this chartbook. Staff of the Office of Information Resources edited the chartbook and prepared the print and web versions for publication.

Your suggestions and comments on this chartbook are welcome. Any suggestions, comments, or questions about the charts should be directed to Shirley Turpin at 410-965-0090 or statistics@ssa.gov. For additional copies or to be removed from our print mailing list, please e-mail op.publications@ssa.gov. This Chartbook, the *Supplement*, and *Income of the Population 55 or Older* are available on our website at <http://www.socialsecurity.gov/policy>.

SSI applications	3.0

Size of Income, 1962 and 2011

Median annual income for married couples and nonmarried persons aged 65 or older has increased markedly since 1962 (the earliest year for which data are available). Even after adjusting for inflation, median income has risen 122% for married couples and 114% for nonmarried persons. A married couple is aged 65 or older if the husband is aged 65 or older or if the husband is aged 54 or younger and the wife is 65 or older.

Median income of aged units, by marital status (in 2011 dollars)

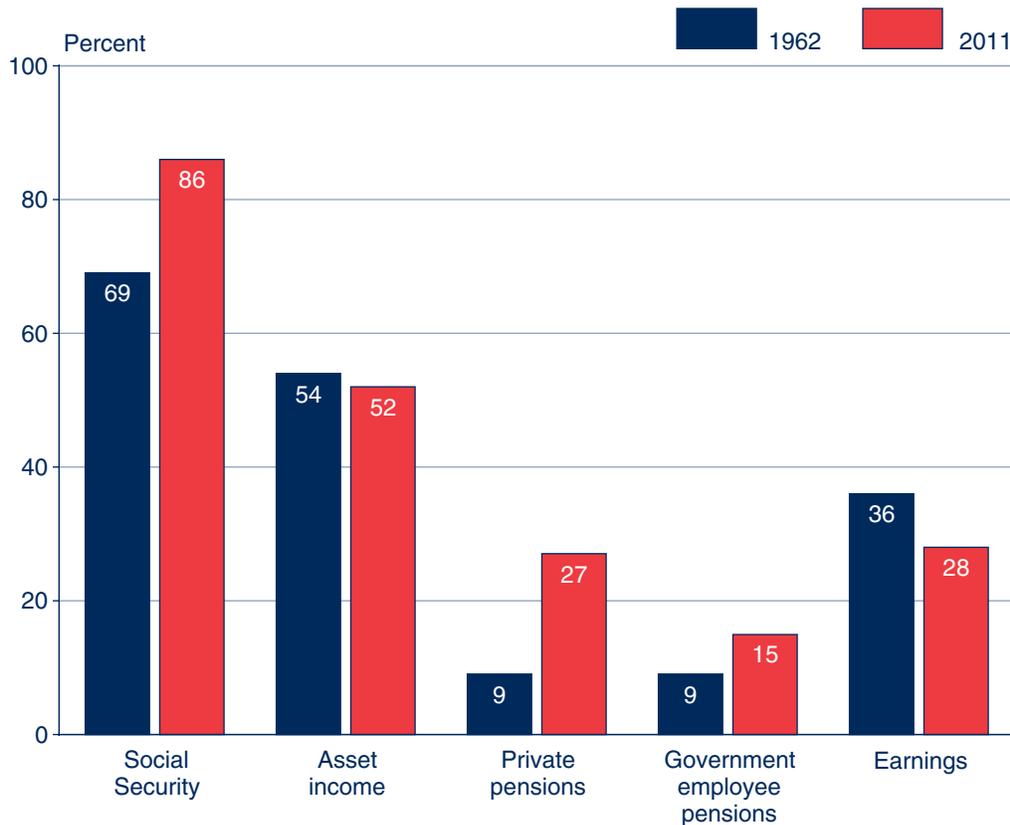

SOURCES: Data for 1962 are from Social Security Administration, *The Aged Population of the United States: The 1963 Social Security Survey of the Aged* (1967). Data for 2011 are Social Security Administration calculations from the March 2012 Annual Social and Economic Supplement to the Current Population Survey.

NOTE: An aged unit is a married couple living together or a nonmarried person, which also includes persons who are separated or married but not living together.

Receipt of Income, 1962 and 2011

Social Security benefits—the most common source of income for married couples and nonmarried persons aged 65 or older in 1962—are now almost universal. The proportion of the aged population with asset income—the next most common source—is similar to that in 1962. Over the 49-year period, receipt of private pensions has tripled, and receipt of government pensions has increased by more than 50%. The proportion of couples and nonmarried persons aged 65 or older who had earnings was smaller in 2011 than in 1962.

Percentage of aged units receiving income, by source

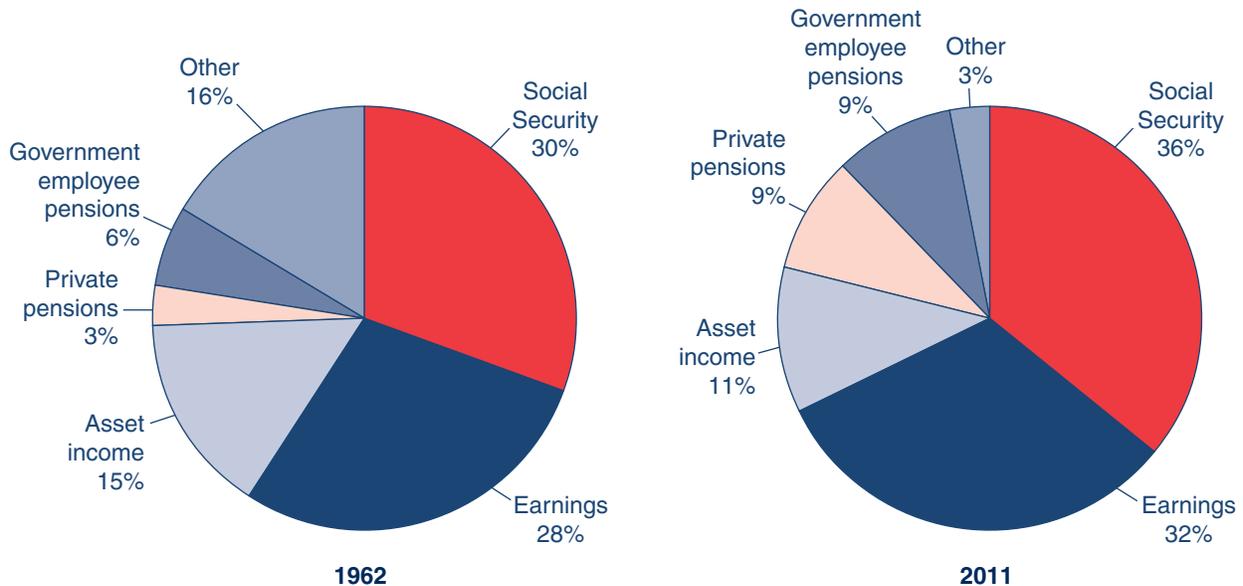

SOURCES: Data for 1962 are from Social Security Administration, *The Aged Population of the United States: The 1963 Social Security Survey of the Aged* (1967). Data for 2011 are Social Security Administration calculations from the March 2012 Annual Social and Economic Supplement to the Current Population Survey.

NOTE: An aged unit is a married couple living together or a nonmarried person, which also includes persons who are separated or married but not living together.

Shares of Aggregate Income, 1962 and 2011

In 1962, Social Security, private and government employee pensions, income from assets, and earnings made up only 84% of the aggregate total income of couples and nonmarried persons aged 65 or older, compared with 96% in 2011. The shares from Social Security, private pensions, government employee pensions, and earnings have increased since 1962, while the share from asset income has declined.

Aggregate income, by source

SOURCES: Data for 1962 are from Social Security Administration, *The Aged Population of the United States: The 1963 Social Security Survey of the Aged* (1967). Data for 2011 are Social Security Administration calculations from the March 2012 Annual Social and Economic Supplement to the Current Population Survey.

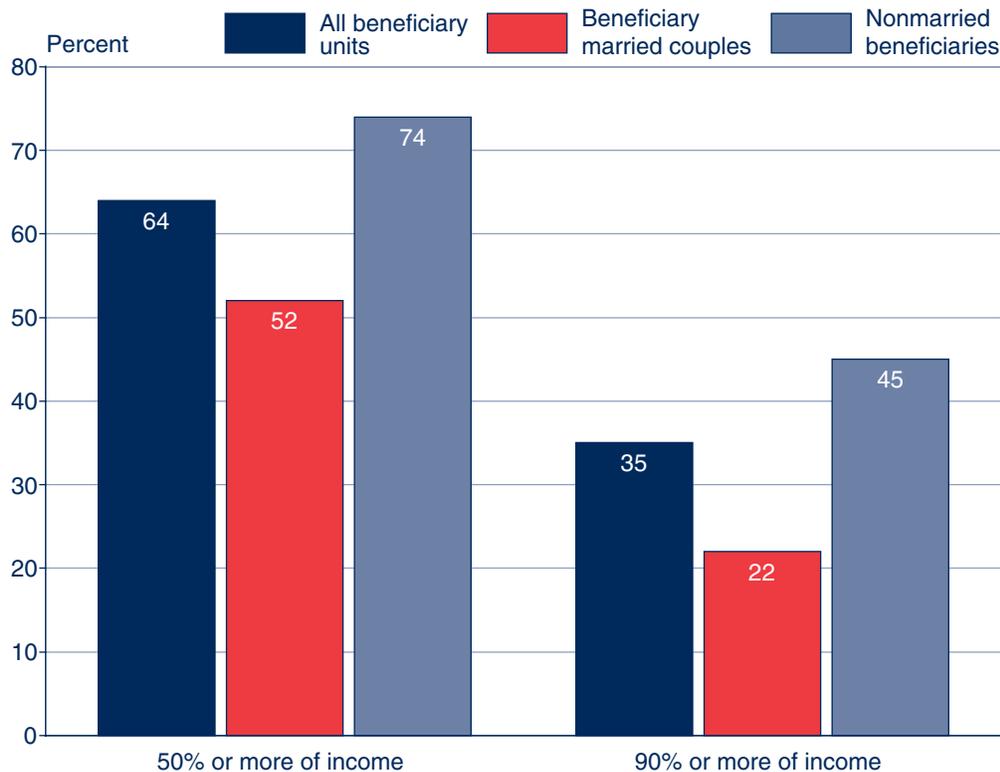

NOTES: The unit of analysis is the aged unit, defined as a married couple living together or a nonmarried person, which also includes persons who are separated or married but not living together.

Totals do not necessarily equal the sum of rounded components.

Relative Importance of Social Security, 2011

In 2011, 87% of married couples and 85% of nonmarried persons aged 65 or older received Social Security benefits. Social Security was the major source of income (providing at least 50% of total income) for 52% of aged beneficiary couples and 74% of aged nonmarried beneficiaries. It was 90% or more of income for 22% of aged beneficiary couples and 45% of aged nonmarried beneficiaries. Total income excludes withdrawals from savings and nonannuitized IRAs or 401(k) plans; it also excludes in-kind support, such as food stamps and housing and energy assistance.

Percentage of aged units receiving Social Security benefits, by relative importance of benefits to total income

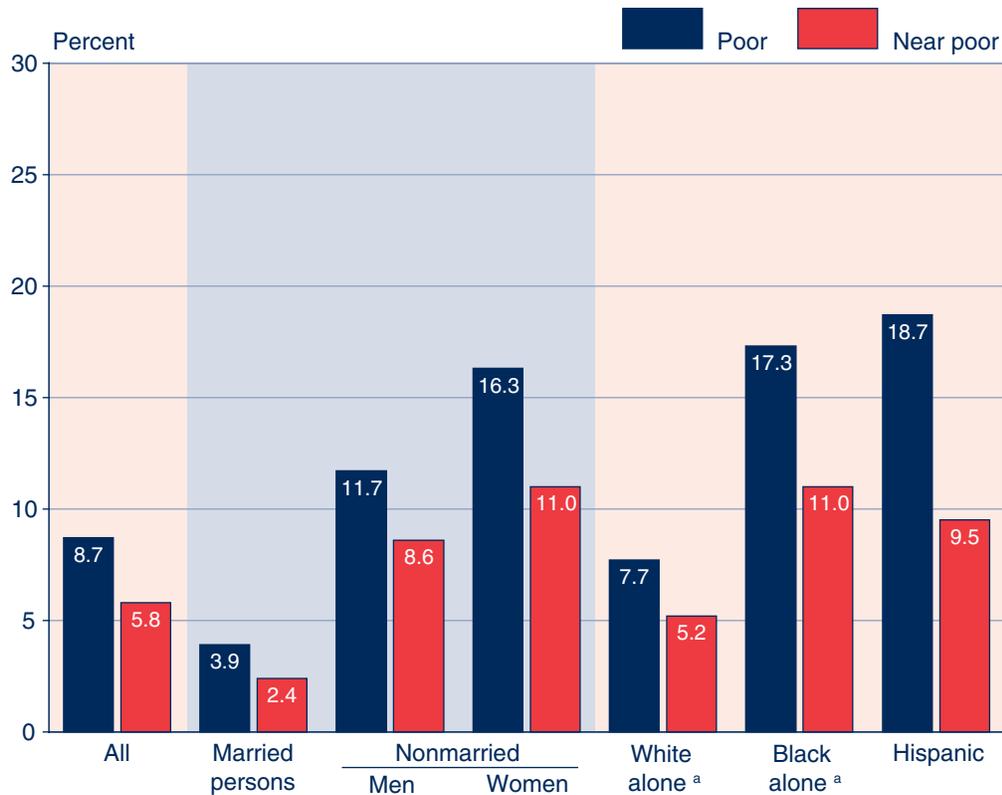

SOURCE: Social Security Administration calculations from the March 2012 Annual Social and Economic Supplement to the Current Population Survey.

NOTE: An aged unit is a married couple living together or a nonmarried person, which also includes persons who are separated or married but not living together.

Poverty Status Based on Family Income, 2011

The aged poor are those with income below the poverty line. The near poor have income greater than or equal to the poverty line and less than 125% of the poverty line. Nonmarried women and minorities have the highest poverty rates, ranging from 16.3% to 18.7%. Married persons have the lowest poverty rates, with 3.9% poor and 2.4% near poor. Overall, 8.7% are poor and 5.8% are near poor.

Poverty status, by marital status, sex of nonmarried persons, race, and Hispanic origin

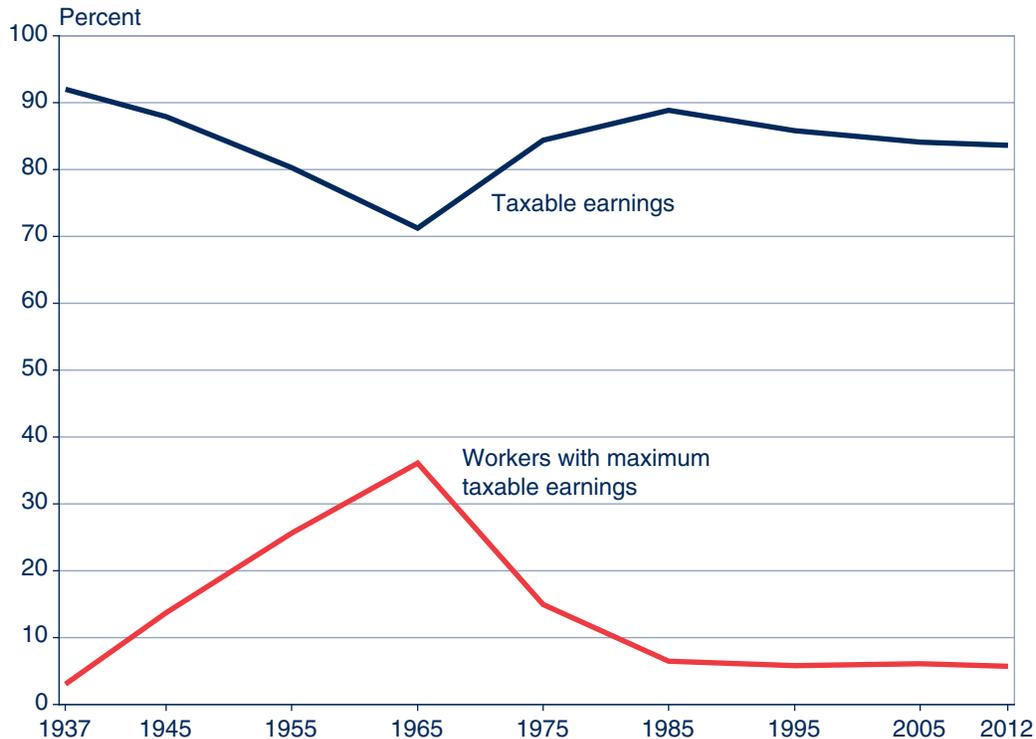

SOURCE: Social Security Administration calculations from the March 2012 Annual Social and Economic Supplement to the Current Population Survey.

a. Current Population Survey respondents may identify themselves in more than one racial group. The “white alone” and “black alone” categories reflect respondents who reported only one race.

Earnings in Covered Employment, 1937–2012

People contribute to Social Security through payroll taxes or self-employment taxes, as required by the Federal Insurance Contributions Act (FICA) and the Self-Employment Contributions Act (SECA). The maximum taxable amount is updated annually on the basis of increases in the average wage. Of the 161 million workers with earnings in Social Security–covered employment in 2012, about 6% had earnings that equaled or exceeded the maximum amount subject to taxes, compared with 3% when the program began and a peak of 36% in 1965. About 84% of earnings in covered employment were taxable in 2012, compared with 92% in 1937.

Taxable earnings as a percentage of earnings in covered employment and percentage of workers with maximum taxable earnings, selected years

SOURCE: Social Security Administration, Office of the Chief Actuary.

Insured Status, 1970–2012

The percentage of persons aged 20 or older who are insured for benefits has remained the same for the past several years. To be fully insured, a worker must have at least one work credit (quarter of coverage) for each year elapsed after age 21 (but no earlier than 1950) and before the year in which he or she attains age 62, becomes disabled, or dies. The maximum number of work credits needed to be fully insured is 40. An individual is said to be permanently insured if he or she has earned 40 work credits. To be insured for disability, the worker must be fully insured and have at least 20 work credits during the last 40 calendar quarters. (Requirements for disability-insured status are somewhat different for persons younger than age 31.) Disability benefits are available up to full retirement age.

Insured workers as a percentage of the corresponding Social Security area population, selected years

Year	Population aged 20 or older		Population aged 20 to full retirement age ^a		
	Millions	Percentage permanently insured	Percentage fully insured	Millions	Percentage insured for disability
1970	135.0	50	77	113.9	63
1975	147.3	51	80	123.7	66
1980	161.8	53	83	135.2	70
1985	174.9	58	84	145.4	72
1990	185.9	63	86	153.6	75
1995	195.9	66	86	161.3	76

2005	218.7	69	87	182.4	78
2010	230.8	69	87	192.0	76
2011	233.4	69	87	193.8	76
2012	236.0	69	87	195.1	76

SOURCE: Social Security Administration, Office of the Chief Actuary.

NOTES: The population in the Social Security area includes residents of the 50 states and the District of Columbia adjusted for net census undercount; civilian residents of American Samoa, Guam, Northern Mariana Islands, Puerto Rico, and U.S. Virgin Islands; federal civilian employees and persons in the U.S. armed forces abroad and their dependents; noncitizens living abroad who are insured for Social Security benefits; and all other U.S. citizens abroad.

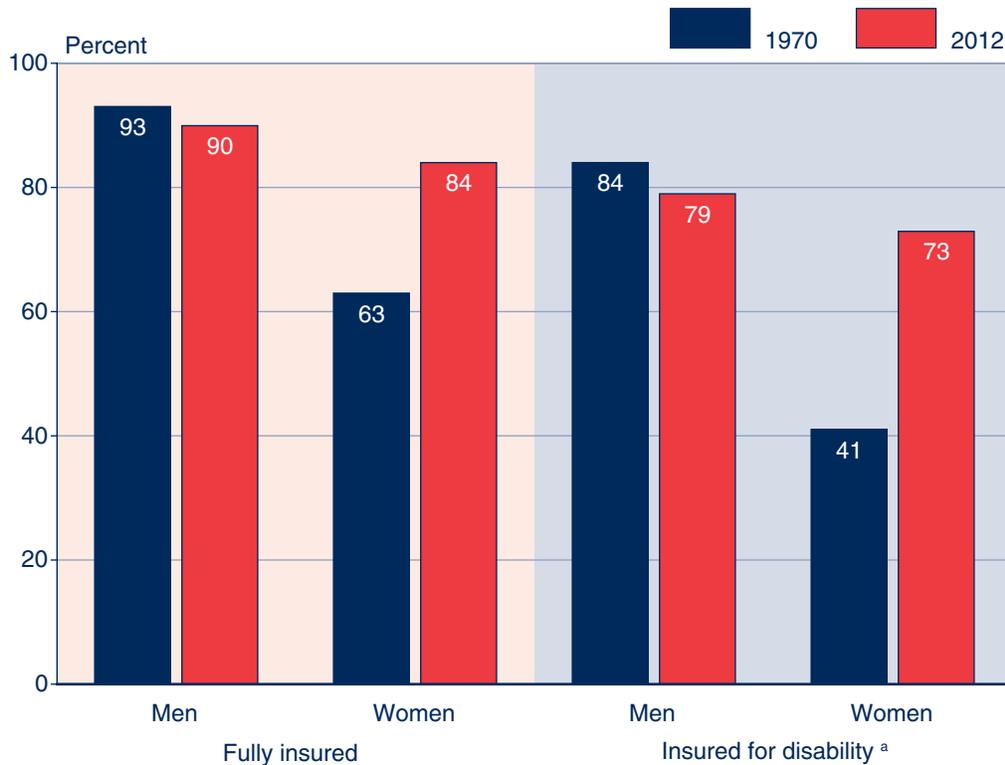

Figures are subject to revision.

a. Insured for disability excludes those who have reached full retirement age.

Insured Status, by Sex, 1970 and 2012

Although men are more likely than women to be insured, the gender gap is shrinking. The proportion of men who are insured has remained essentially stable, with 90% fully insured and 79% insured for disability. By contrast, the proportion of women who are insured has increased dramatically—from 63% to 84% fully insured and from 41% to 73% insured for disability.

Percentage of population in the Social Security area fully insured and insured for disability benefits, by sex

a. Insured for disability excludes those who have reached full retirement age.

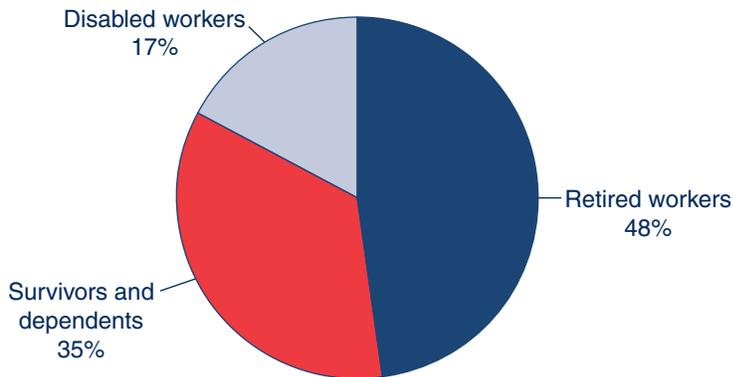

New Benefit Awards, 2012

Benefits were awarded to about 5.7 million persons; of those, 48% were retired workers and 17% were disabled workers. The remaining 35% were survivors or the spouses and children of retired or disabled workers. These awards represent not only new entrants to the benefit rolls but also persons already on the rolls who become entitled to a different benefit, particularly conversions of disabled-worker benefits to retired-worker benefits at full retirement age.

New awards, by type of beneficiary

Beneficiary	Number (thousands)	Percent
Total	5,655	100
Retired workers and dependents	3,247	57
Workers	2,735	48
Spouses and children	512	9
Disabled workers and dependents	1,523	27
Workers	960	17
Spouses and children	563	10
Survivors of deceased workers	885	16

New awards, 2012

SOURCE: Social Security Administration, Master Beneficiary Record, 100 percent data.

NOTE: Totals do not necessarily equal the sum of rounded components.

New Awards to Workers, 1972–2012

Awards to retired workers have increased considerably over the past four decades, but proportionately much less than awards to disabled workers. The annualized rate of increase over the period from 1972 to 2012 is 1.6% for retired workers and 2.2% for disabled workers. The annual number of awards to retired workers rose from 1.5 million in 1972 to 2.7 million in 2012, while for disabled workers it increased from 455,000 in 1972 to 1.0 million in 2012.

New awards to retired and disabled workers

SOURCE: Social Security Administration, Master Beneficiary Record, 100 percent data.

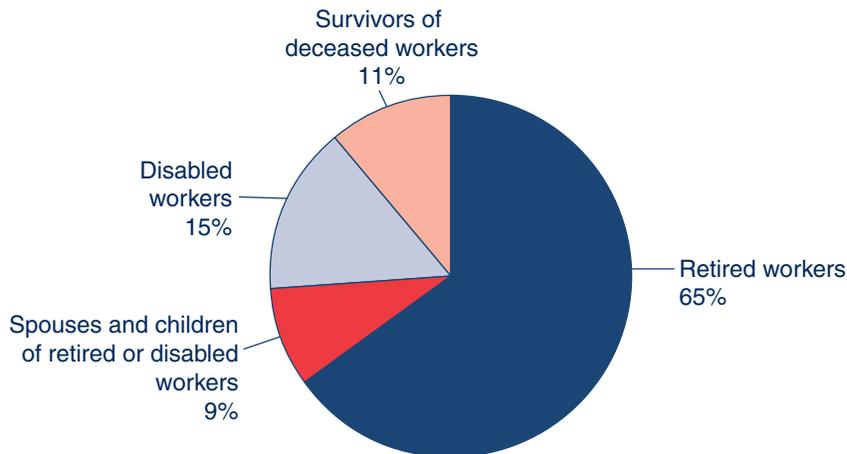

Beneficiaries in Current-Payment Status, December 2012

More than 56 million beneficiaries were in current-payment status, that is, they were being paid a benefit. Sixty-five percent of those beneficiaries were retired workers and 15% were disabled workers. The remaining 20% were survivors or the spouses and children of retired or disabled workers.

Beneficiaries in current-payment status

Beneficiary	Number (thousands)	Percent
Total	56,758	100
Retired workers and dependents	39,613	70
Workers	36,720	65
Spouses and children	2,893	5
Disabled workers and dependents	10,889	19
Workers	8,827	15
Spouses and children	2,063	4
Survivors of deceased workers	6,256	11

Beneficiaries, by type

SOURCE: Social Security Administration, Master Beneficiary Record, 100 percent data.

NOTE: Totals do not necessarily equal the sum of rounded components.

Average Benefit Amounts, 2012

Benefits payable to workers who retire at the full retirement age and to disabled workers are equal to 100% of the PIA (subject to any applicable deductions). At the full retirement age, widow(er)s' benefits are also payable at 100% of the insured worker's PIA. Nondisabled widow(er)s can receive reduced benefits at age 60. Disabled widow(er)s can receive reduced benefits at age 50. Spouses, children, and parents receive a smaller proportion of the worker's PIA than do widow(er)s.

Average monthly benefit for new awards and for benefits in current-payment status (in dollars)

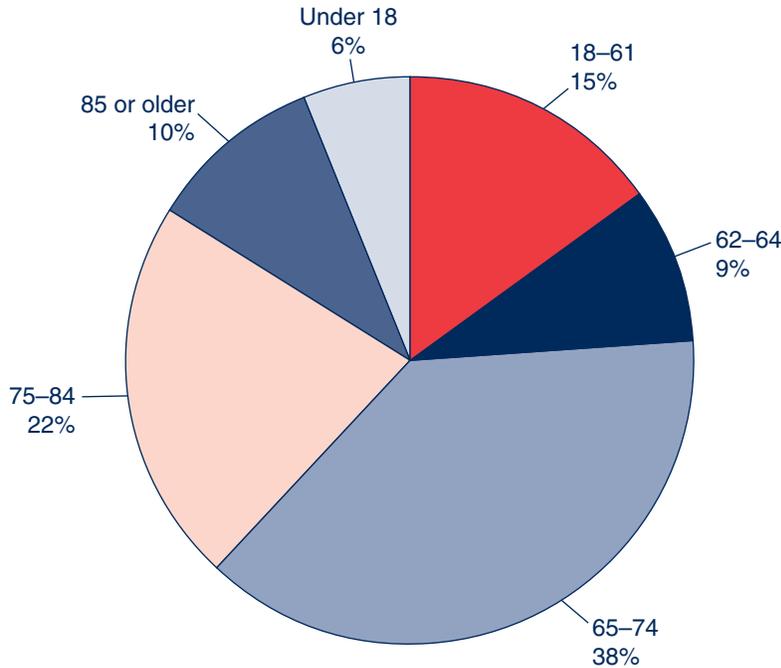

Beneficiary	New awards	Benefits in current-payment status, December
Retired workers	1,292	1,262
Spouses	485	626
Children	580	617
Disabled workers	1,204	1,130
Spouses	322	304
Children	314	336
Survivors of deceased workers		
Nondisabled widow(er)s	975	1,215
Disabled widow(er)s	685	711
Widowed mothers and fathers	866	900
Surviving children	790	799
Parents	989	1,073

SOURCE: Social Security Administration, Master Beneficiary Record, 100 percent data.

Beneficiaries, by Age, December 2012

About four-fifths of all OASDI beneficiaries in current-payment status were aged 62 or older, including 22 percent aged 75–84 and 10 percent aged 85 or older. About 15 percent were persons aged 18–61 receiving benefits as disabled workers, survivors, or dependents. Another 6 percent were children under age 18.

Beneficiaries, by age

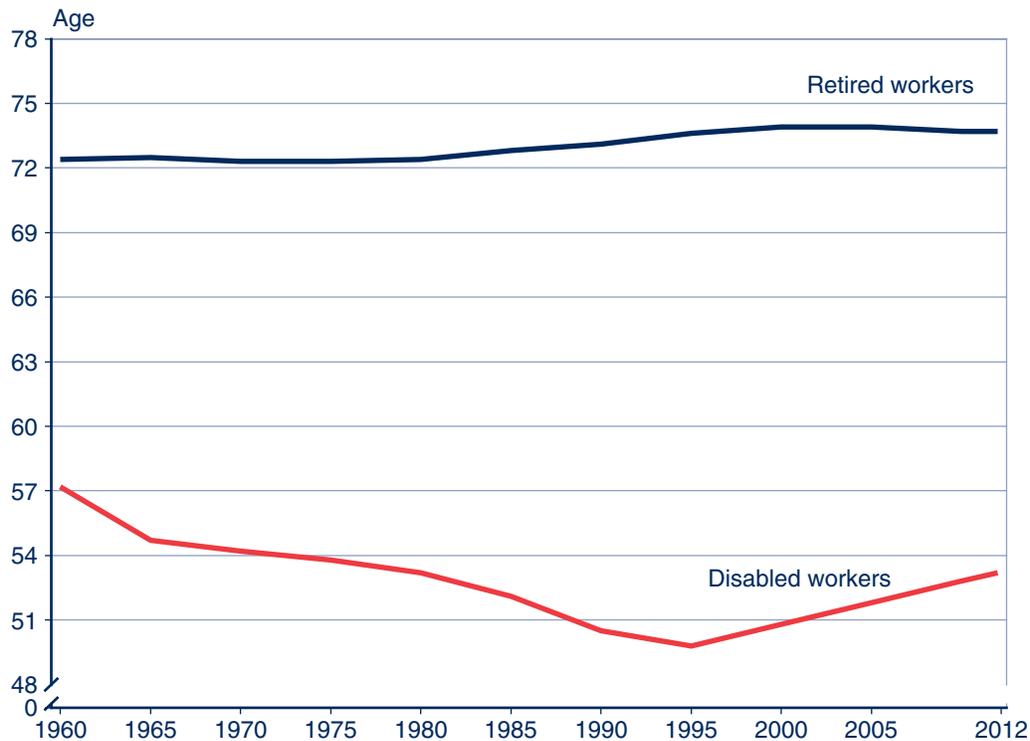

SOURCE: Social Security Administration, Master Beneficiary Record, 100 percent data.

Disabled and Retired Workers, by Age, 1960–2012

The average age of disabled-worker beneficiaries in current-payment status has declined substantially since 1960, when DI benefits first became available to persons younger than age 50. In that year, the average age of a disabled worker was 57.2 years. The rapid drop in average age in the following years reflects a growing number of awards to workers under 50. By 1995, the average age had fallen to a low of 49.8, and by 2012, it had risen to 53.2. By contrast, the average age of retired workers has changed little over time, rising from 72.4 in 1960 to 73.7 in 2012.

Average age of disabled and retired workers, selected years

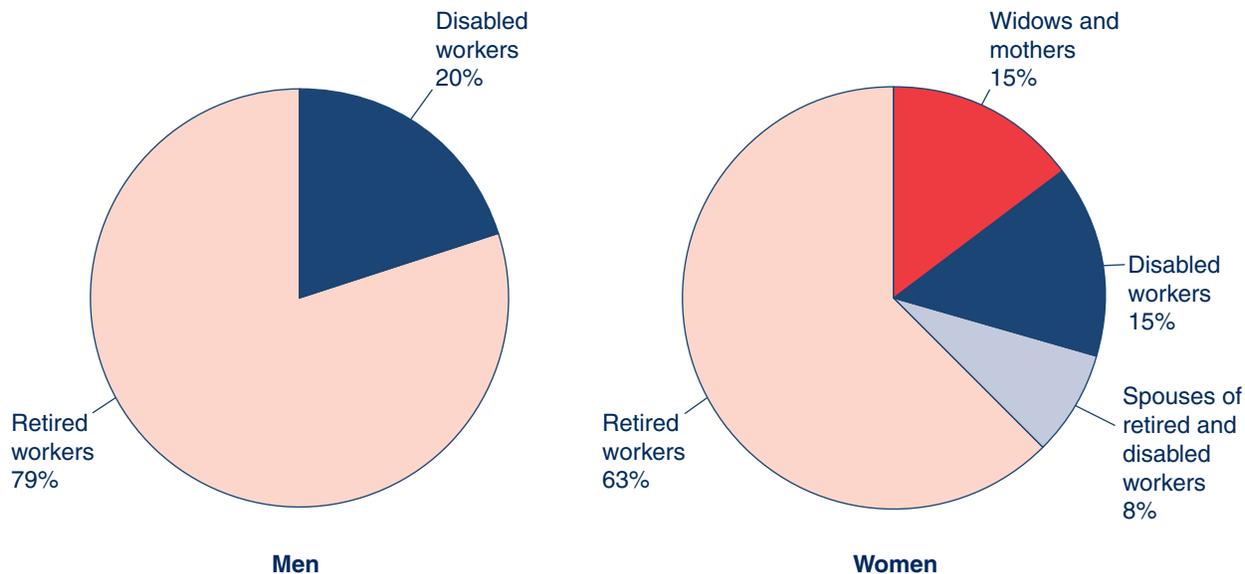

SOURCE: Social Security Administration, Master Beneficiary Record, 10 percent sample for 1990–2005 and 100 percent data for all other years.

Beneficiaries, by Sex, December 2012

Of all adults receiving monthly Social Security benefits, 45% were men and 55% were women. Seventy-nine percent of the men and 63% of the women received retired-worker benefits. Fifteen percent of the women received survivor benefits.

Adult beneficiaries, by type of beneficiary and sex

SOURCE: Social Security Administration, Master Beneficiary Record, 100 percent data.

NOTE: Totals do not necessarily equal the sum of rounded components.

Average Monthly Benefit, by Sex, December 2012

Among retired and disabled workers who collected benefits based on their own work records, men received a higher average monthly benefit than did women. For those with benefits based on another person's work record (spouses and survivors), women had higher average benefits.

Average monthly benefit (in dollars)

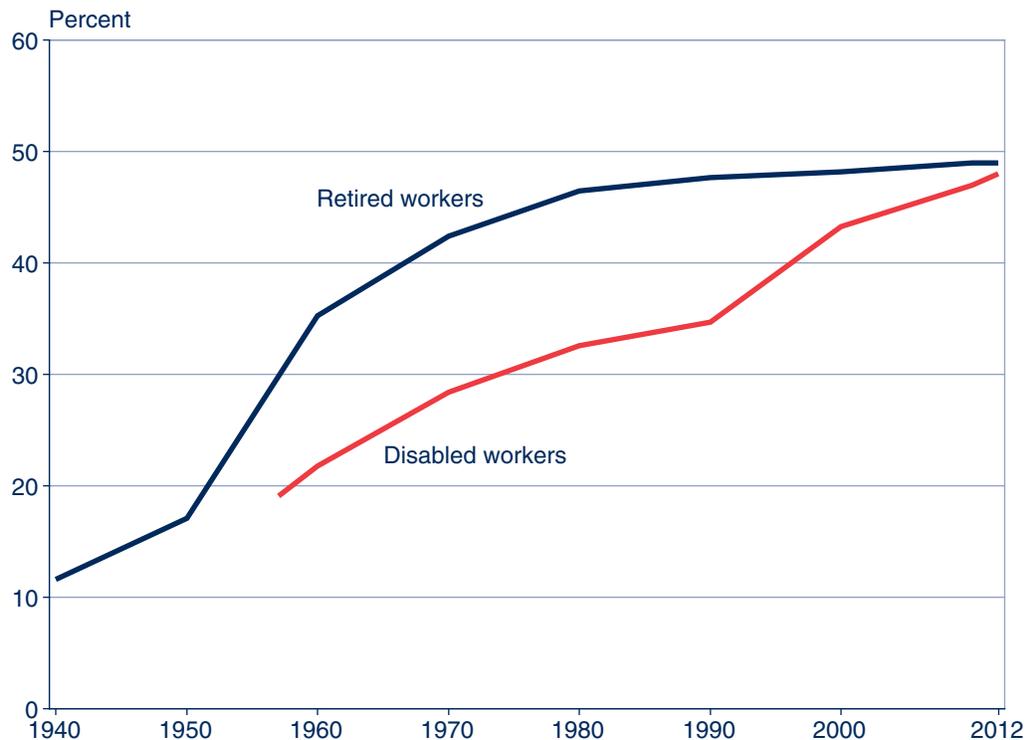

Beneficiary	Men	Women
Workers		
Retired	1,417	1,103
Disabled	1,256	993
Spouses of—		
Retired workers	433	633
Disabled workers	267	306
Survivors of deceased workers		
Nondisabled widow(er)s	1,057	1,218
Disabled widow(er)s	522	723
Mothers and fathers	771	912

SOURCE: Social Security Administration, Master Beneficiary Record, 100 percent data.

Women Beneficiaries, 1940–2012

The proportion of women among retired-worker beneficiaries has quadrupled since 1940. The percentage climbed from 12% in 1940 to 47% in 1980, 48% in 1990, and 49% in 2012. The proportion of women among disabled-worker beneficiaries has more than doubled since 1957, when DI benefits first became payable. The percentage rose steadily from 19% in 1957 to 35% in 1990 and 48% in 2012.

Women beneficiaries as a percentage of retired workers and disabled workers, selected years

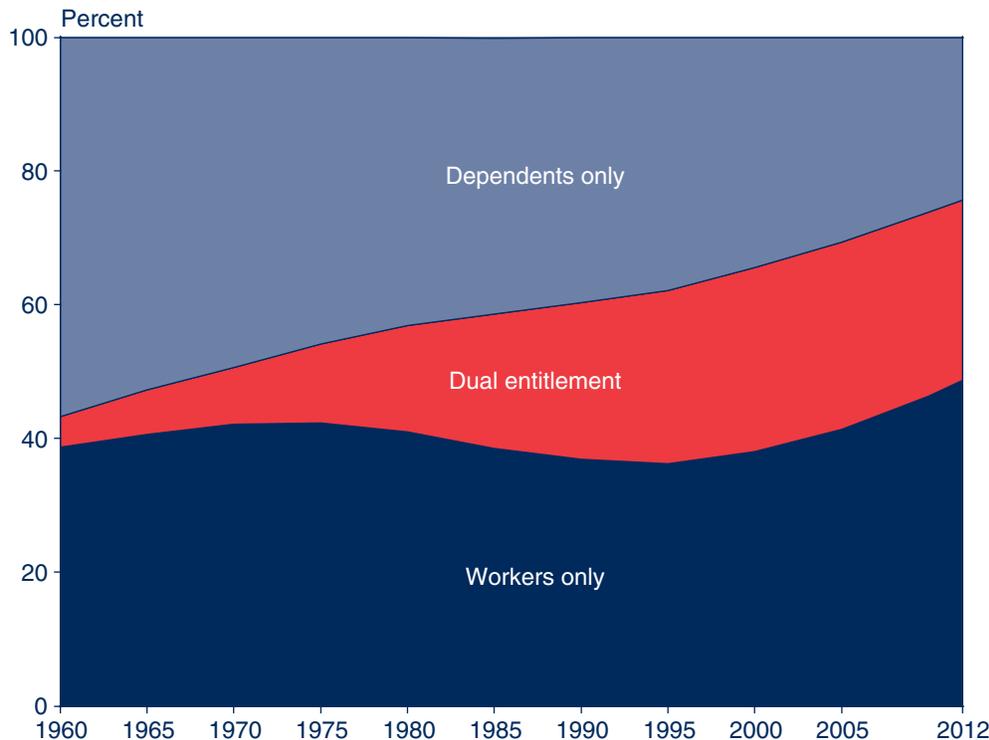

SOURCE: Social Security Administration, Master Beneficiary Record, 100 percent data.

Women with Dual Entitlement, 1960–2012

The proportion of women aged 62 or older who are receiving benefits as dependents (that is, on the basis of their husbands' earnings record only) has been declining—from 57% in 1960 to 24% in 2012. At the same time, the proportion of women with dual entitlement (that is, paid on the basis of both their own earnings records and those of their husbands) has been increasing—from 5% in 1960 to 27% in 2012.

Women aged 62 or older, by basis of entitlement, selected years

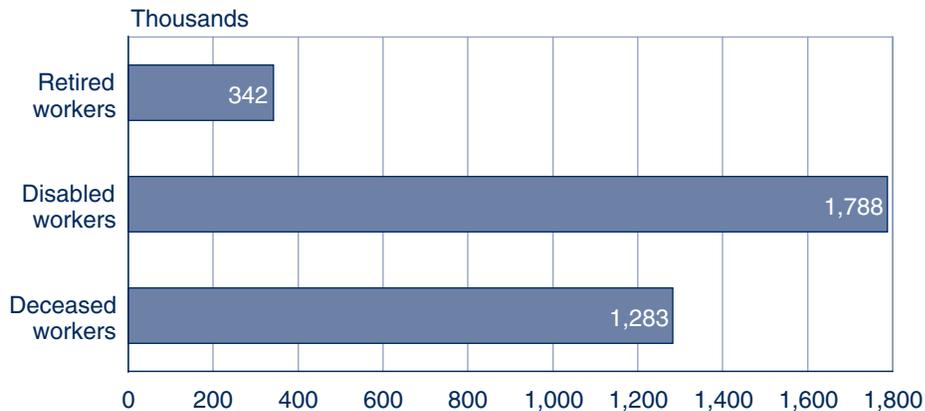

SOURCE: Social Security Administration, Master Beneficiary Record. All data for 2005 and dual entitlement data for 1995 and 2000 are based on a 10 percent sample. All other years are 100 percent data.

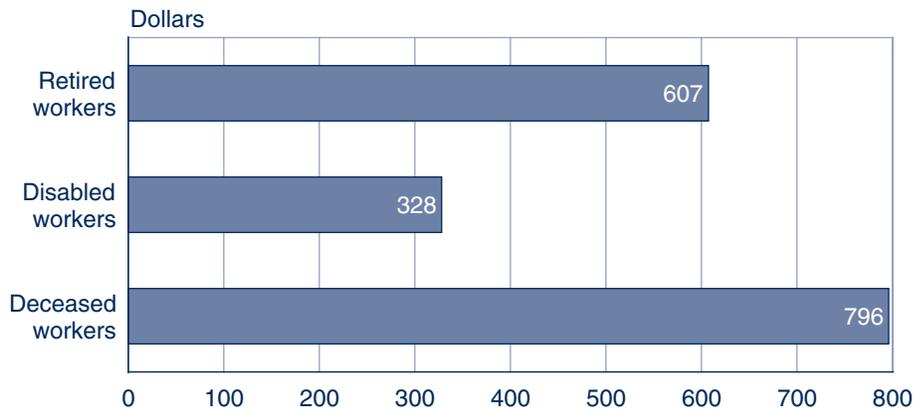

Child Beneficiaries, December 2012

More than 3.4 million children under age 18 and students aged 18–19 received OASDI benefits. Children of deceased workers had the highest average payments, in part because they are eligible to receive monthly benefits based on 75% of the worker’s PIA, compared with 50% for children of retired or disabled workers. Overall, the average monthly benefit amount for children was \$532.

Number of children of—

Average monthly benefit for children of—

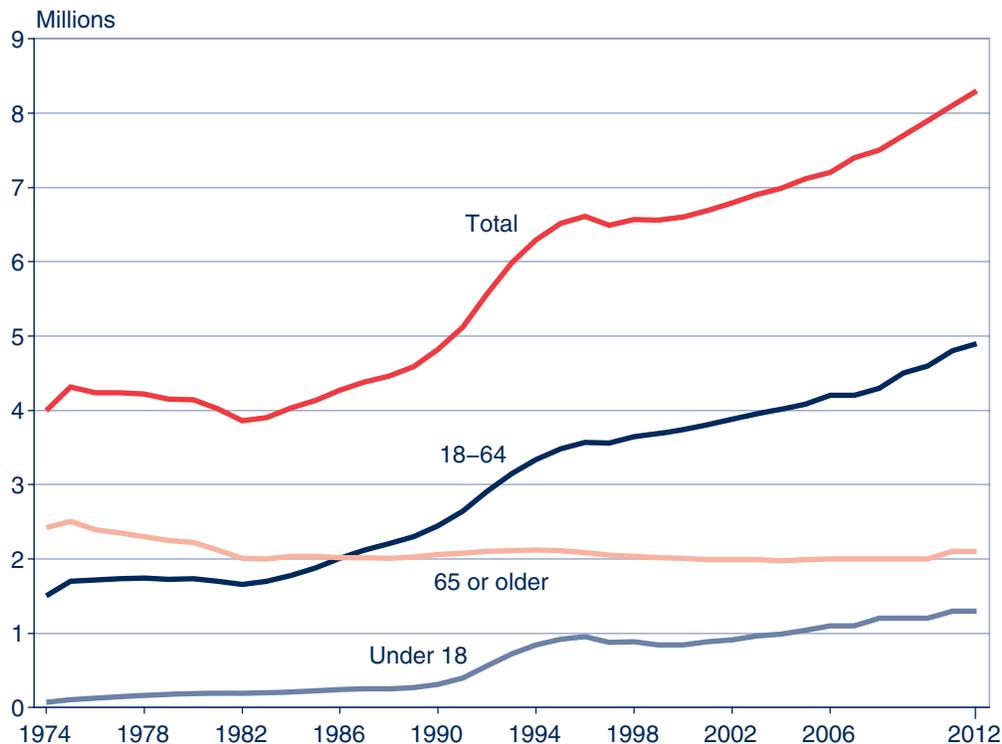

SOURCE: Social Security Administration, Master Beneficiary Record, 100 percent data.

Number of Recipients, 1974–2012

The Supplemental Security Income (SSI) program provides income support to needy persons aged 65 or older, blind or disabled adults, and blind or disabled children. Eligibility requirements and federal payment standards are nationally uniform. SSI replaced the former federal/state adult assistance programs in the 50 states and the District of Columbia.

Payments under SSI began in January 1974, with 3.2 million persons receiving federally administered payments. By December 1974, this number had risen to nearly 4 million and remained at about that level until the mid-1980s, then rose steadily, reaching nearly 6 million in 1993 and 7 million by the end of 2004. As of December 2012, the number of recipients was about 8.3 million. Of this total, almost 4.9 million were between the ages of 18 and 64, 2.1 million were aged 65 or older, and 1.3 million were under age 18.

Persons receiving federally administered SSI payments, December

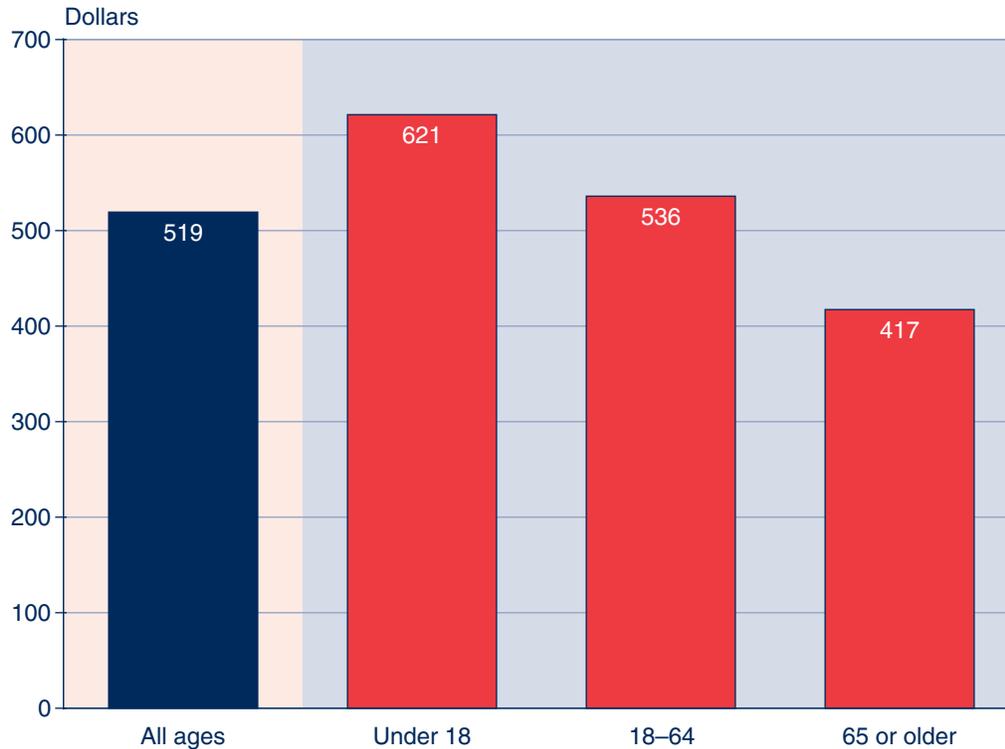

SOURCE: Social Security Administration, Supplemental Security Record, 100 percent data.

Payment Amounts, by Age, December 2012

The average monthly federally administered SSI payment was \$519. Payments varied by age group, ranging from an average of \$621 for recipients aged under 18 to \$417 for those aged 65 or older. The maximum federal benefit rate in December 2012 was \$698 for an individual and \$1,048 for a couple, plus any applicable state supplementation.

Average monthly federally administered SSI payment

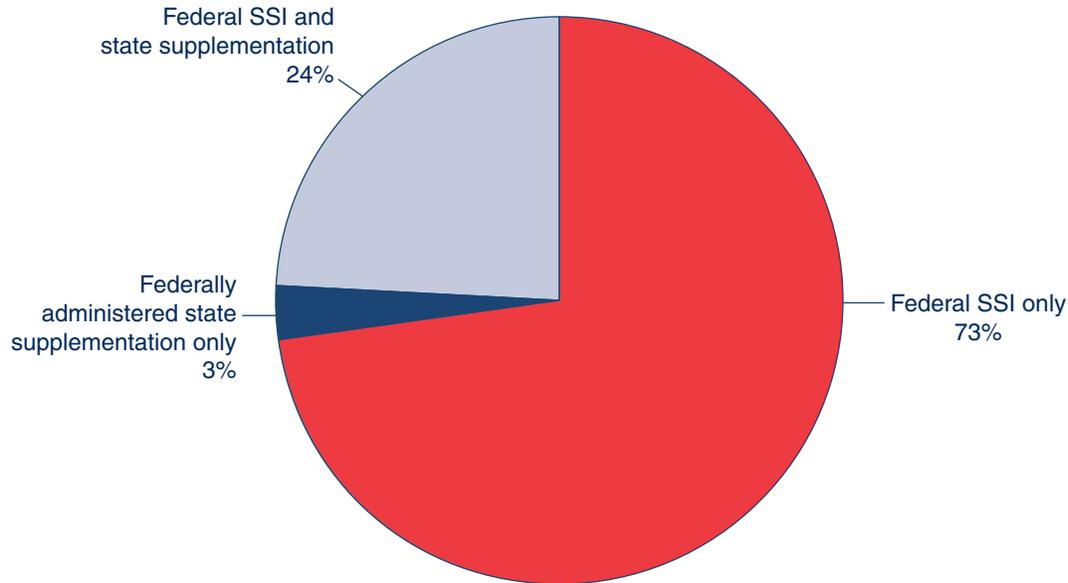

SOURCE: Social Security Administration, Supplemental Security Record, 100 percent data.

NOTE: Amounts exclude retroactive payments.

Federally Administered Payments, December 2012

A total of 8.3 million persons received federally administered SSI payments. The majority received federal SSI only. States have the option of supplementing the federal benefit rate and are required to do so if that rate is less than the income the recipient would have had under the former state program.

Type of SSI payment

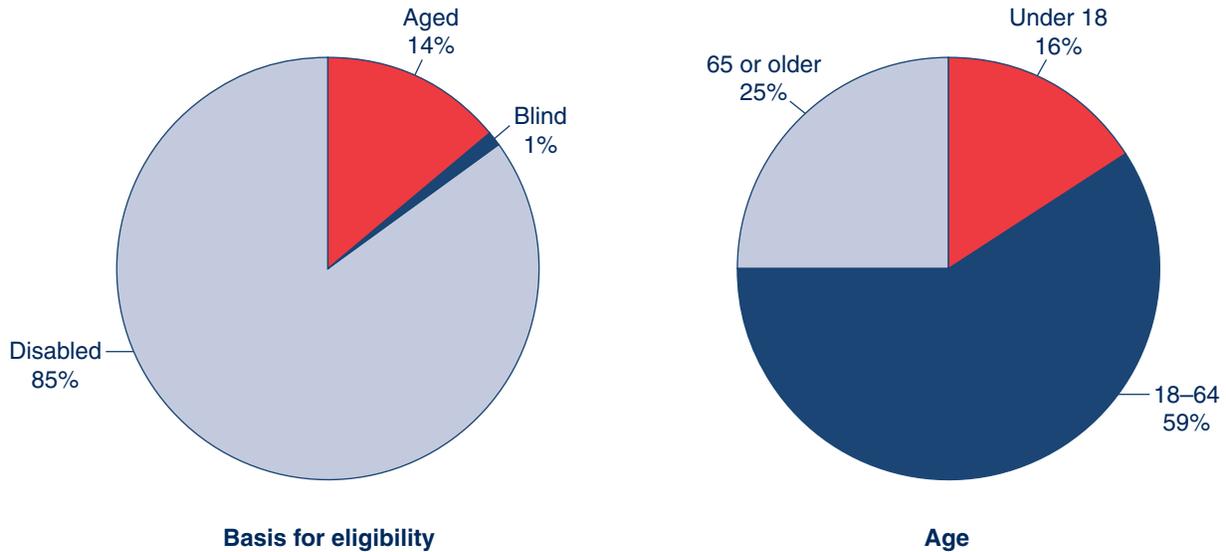

SOURCE: Social Security Administration, Supplemental Security Record, 100 percent data.

Basis for Eligibility and Age of Recipients, December 2012

Fourteen percent of SSI recipients received benefits on the basis of age, the rest on the basis of disability. Twenty-five percent of the recipients were aged 65 or older. In the SSI program, a disabled recipient is still classified as “disabled” after reaching age 65. In the OASDI program, DI beneficiaries are converted to the retirement program when they attain full retirement age.

SSI recipients, by basis for eligibility and age

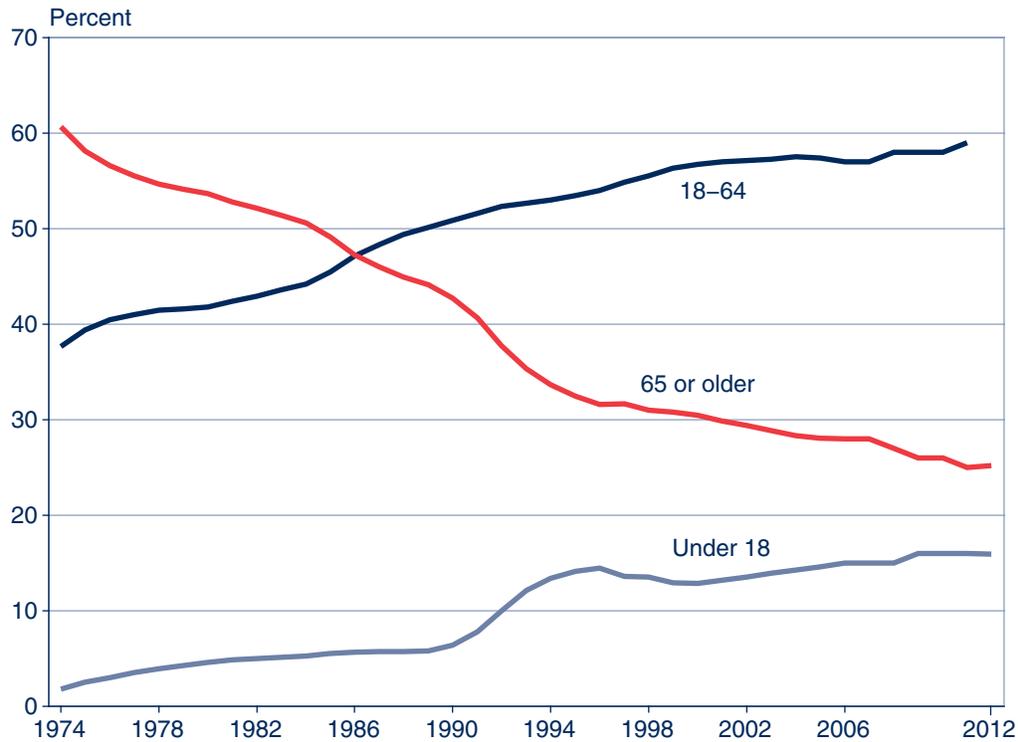

SOURCE: Social Security Administration, Supplemental Security Record, 100 percent data.

Percentage Distribution of Recipients, by Age, 1974–2012

The proportion of SSI recipients aged 65 or older has declined from 61% in January 1974 to 25% in December 2012. The overall long-term growth of the SSI program has occurred because of an increase in the number of disabled recipients, most of whom are under age 65.

Percentage distribution of SSI recipients, by age, December

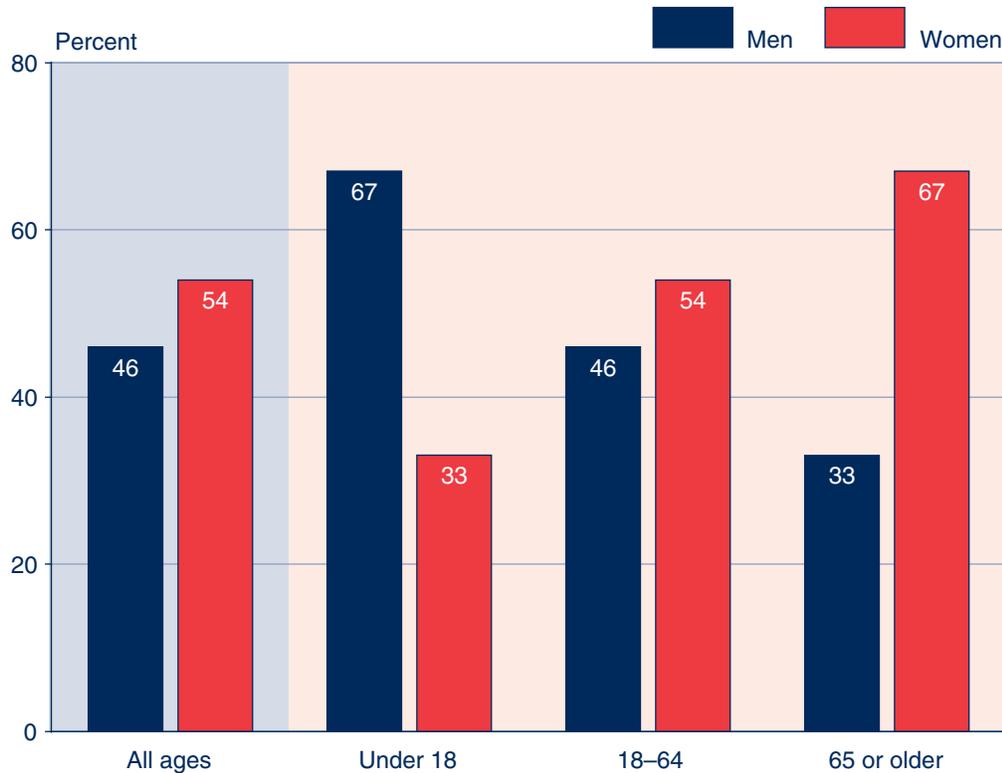

SOURCE: Social Security Administration, Supplemental Security Record, 100 percent data.

Recipients, by Sex and Age, December 2012

Overall, 54% of the approximately 8.3 million SSI recipients were women, but that percentage varied greatly by age group. Women accounted for 67% of the 2.1 million recipients aged 65 or older, 54% of the 4.9 million recipients aged 18–64, and 33% of the 1.3 million recipients under age 18.

SSI recipients, by sex and age

Other Income, December 2012

Over fifty-six percent of SSI recipients aged 65 or older received OASDI benefits, as did 30.8% of those aged 18–64 and 7.6% of those under age 18. Other types of unearned income, such as income from assets, were reported most frequently among those under age 18 (20.2%) and those aged 65 or older (11.3%). Earned income was most prevalent (4.8%) among those aged 18–64.

Child Recipients, 1974–2012

In 1974, when the program began, 70,900 blind and disabled children were receiving SSI. That number increased to 955,000 in 1996, declined to 847,000 in 2000, and is now 1,311,861. The relatively high average payment to children (compared with payments made to blind and disabled adults) is due in part to a limited amount of other countable income. The spike in average monthly benefits in 1992 is due to retroactive payments resulting from the *Sullivan v. Zebley* decision. As of December 2012, blind and disabled children were receiving SSI payments averaging \$621.

a. As of 1998, these figures exclude retroactive payments.

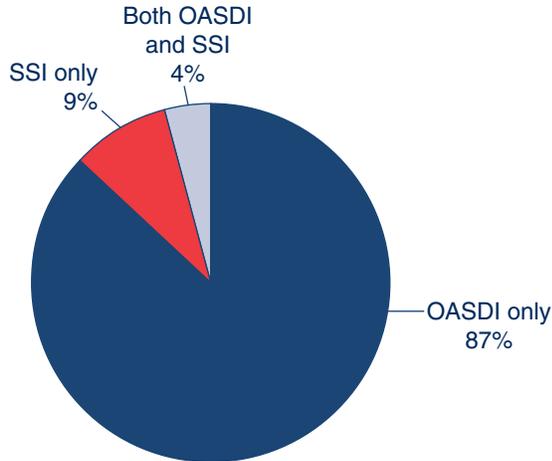

All Beneficiaries, December 2012

About 61.9 million people received a payment from Social Security. Most (53.6 million) received OASDI benefits only, about 5.5 million received SSI only, and 2.8 million received payments from both programs.

Beneficiaries receiving OASDI, SSI, or both

Benefit	Number (thousands)
Total (unduplicated)	61,860
OASDI	56,357
OASDI only	53,597
SSI	8,263
SSI only	5,503
Both OASDI and SSI	2,760

Distribution of all beneficiaries

NOTE: OASDI beneficiaries who are entitled to both a primary and a secondary benefit (dual entitlement) are counted only once. SSI includes federal SSI payments and federally administered state supplementation.

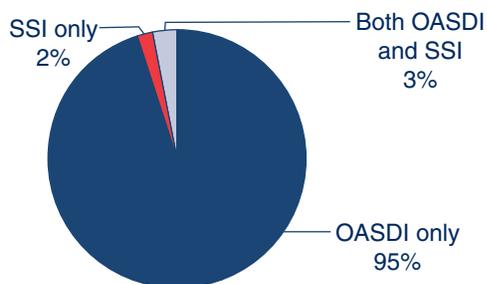

Beneficiaries Aged 65 or Older, December 2012

Benefits were paid to 40.4 million people aged 65 or older. Nearly 1.2 million received both OASDI and SSI.

Beneficiaries aged 65 or older receiving OASDI, SSI, or both

Beneficiary	Number (thousands)
Total (unduplicated)	40,447
OASDI	
Total	39,531
Retired workers	33,440
Disabled workers	456
Spouses	2,062
Widow(er)s	3,491 ^a
Disabled adult children	82
OASDI only	38,365
SSI	
Total	2,082 ^b
Receiving SSI only	916
Receiving both OASDI and SSI	1,166

Distribution of beneficiaries aged 65 or older, by program

NOTE: OASDI beneficiaries who are entitled to both a primary and a secondary benefit (dual entitlement) are counted only once. SSI includes federal SSI payments and federally administered state supplementation.

a. Includes persons who received dependent parent's benefits or mother's and father's benefits.

b. Includes 925,400 SSI beneficiaries aged 65 or older who are disabled or blind.

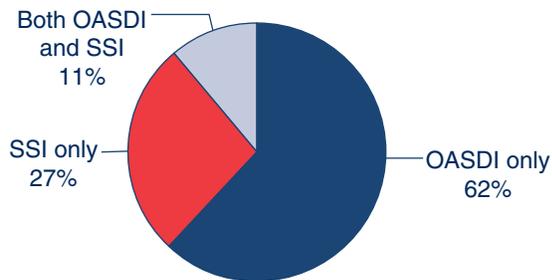

Disabled Beneficiaries Aged 18–64, December 2012

Payments were made to 12.7 million people aged 18–64 on the basis of their own disability. Sixty-two percent received disability payments from the OASDI program only, 27% received payments from the SSI program only, and 11% received payments from both programs.

Disabled beneficiaries aged 18–64 receiving OASDI, SSI, or both

Beneficiary	Number (thousands)
Total (unduplicated)	12,734
OASDI disability	
Total	9,275
Workers aged 64 or younger	8,353
Disabled adult children	810
Widow(er)s	112
OASDI disability only	7,865
SSI disability	
Total	4,870
Receiving SSI disability only	3,459
Receiving both OASDI and SSI disability	1,410

Distribution of disabled beneficiaries aged 18–64

How Social Security Is Financed

Social Security is largely a pay-as-you-go program. Most of the payroll taxes collected from today's workers are used to pay benefits to today's recipients. In 2012, the Old-Age and Survivors Insurance and Disability Insurance Trust Funds collected \$840.2 billion in revenues. Of that amount, 83.8% was from payroll tax contributions and reimbursements from the General Fund of the Treasury and 3.2% was from income taxes on Social Security benefits. Interest earned on the government bonds held by the trust funds provided the remaining 13.0% of income. Assets increased in 2012 because total income exceeded expenditures for benefit payments and administrative expenses.

Social Security's Demographic Challenge

The 2013 Trustees Report projects that the number of retired workers will grow rapidly, as members of the post–World War II baby boom continue to reach early retirement age, and will almost double in the next 30 years. People are also living longer, and the birth rate is low. As a result, the Trustees project that the ratio of 2.9 workers paying Social Security taxes to each person collecting benefits in 2012 will fall to 2.1 to 1 in 2031. In 2010, tax and other noninterest income did not fully cover program cost, and the 2013 Trustees Report projects that this pattern will continue for at least 75 years. However, the Trustees also project that redemption of trust fund assets will be sufficient to allow for full payment of scheduled benefits through 2032.

The Long-Run Financial Outlook

Social Security is not sustainable over the long term at current benefit and tax rates. In 2010, the program paid more in benefits and expenses than it collected in taxes and other noninterest income, and the 2013 Trustees Report projects this pattern to continue for the next 75 years. The Trustees estimate that the trust fund reserves will be exhausted by 2033. At that point, payroll taxes and other income will flow into the fund but will be sufficient to pay only about 75% of program costs. As reported in the 2013 Trustees Report, the projected shortfall over the next 75 years is 2.72% of taxable payroll.
