Beginning with poverty reports for 1981, the Census Bureau discontinued making distinctions based on householder's sex or between farm and nonfarm families of the same size and composition. Additionally, larger Current Population Survey samples permitted separate poverty income criteria for families of 7,8 , and 9 or more persons. The Social Security Administration developed separate criteria for these larger families by number of children for the base year 1978 on the same basis as the original poverty matrix for smaller families, and has since updated the criteria by means of the all-items CPI. For additional details, see Census Bureau's Current Population Reports Series P-60, No. 133, "Characteristics of the Population Below the Poverty Level, 1980."
a. Beginning in January 1978, the Bureau of Labor Statistics introduced a new price index for all urban consumers (CPI-U) for all items (1982-1984 $=100$ ) that forms a continuous series with the earlier index for urban wage earners and for clerical workers as of December 1977.

NOTES: Living arrangements as of March 2016.
Poverty status in 2015 as reflected by income of unrelated individual or family money income for year compared with official poverty income criterion for families of appropriate size and composition.
Table includes civilian noninstitutionalized population residing in the 50 states and the District of Columbia.
Totals do not necessarily equal the sum of rounded components.
For a discussion of standard errors of estimated numbers and percentages, see Census Bureau, Current Population Reports, Series P-60.
a. Aged family members who are neither the family householder nor the spouse of the householder. Official poverty classification is based on combined income of all related persons living together. Persons in this group are classified here on the basis of official poverty criteria for family income and on a comparison of their own income with official poverty criteria for elderly persons maintaining their own households. The hidden poor are other relatives in nonpoor households whose own income is below the official poverty line for unrelated individuals or married couples.

Separate figures for Alaska and Hawaii reflect Office of Economic Opportunity administrative practice beginning in the 1966-1970 period. The Census Bureau, producer of the primary version of the poverty measure (the poverty thresholds), does not produce separate figures for Alaska and Hawaii.
Before 1983, the guidelines shown are for nonfarm families only.
a. The guidelines are effective from the date of issuance (unless otherwise specified by a particular program using them).
b. Add this amount for each additional family member. Before 1973, increments between some of the smaller family sizes differed from the increment shown in the table. Beginning in 1973, the increment is the same for all family sizes in each year's set of guidelines, with rare exceptions (such as in 2016) caused by rounding and standardizing adjustments.
